PROFESSIONAL EXPERIENCE

Appian – Senior Consultant *Oct. 2011-Jan. 2014*

AIG – Project Manager & Technical Lead *Dec. 2012-Jan. 2014*

- Used Scrum methodology to manage and mentor ~20 developers through design, implementation, and testing web applications using Appian's BPM Suite.
- Successfully deployed 21 applications during a one year period with another 10 in development and testing. Averaged ~$42,000 in savings a year per application.

Vermont Mutual – Overhauled Development *Oct. 2012- Dec. 2012*

- Joined an underperforming project and revised project methodology, overhauled Appian development, and injected energy back into the implementation to restore client confidence in the product and solution. Professional Services MVP - Q4 2012

Liberty Mutual – Developer-to-Lead *Oct. 2011- Oct. 2012*

- Built an underwriting platform for automating the submission of commercial insurance applications, including difficult integrations with an OCR vender and Dun & Bradstreet.
- Started out as a novice developer and ended up to Project Manager for 7-10 people.

Accenture – Consulting Analyst *Oct. 2010- Sept. 2011*

Duke Energy – Financial Application Implementation *Nov. 2010- Sept. 2011*

- Managed a team of onshore and offshore developers in creating over 140 financial reports using an Oracle BI tool. Led a demanding defect cycle with >600 fixes.

Medtronic – Summer Associate *June 2010-Aug. 2010*

- Led a project to make preclinical studies more accessible and traceable by developing a department-wide database system. Categorized over 20 years' worth of animal studies.

Brain Imaging and Analysis Center – Research Assistant (part-time) *Sept. 2007-May 2010*

- Built and managed a neurosurgical database for securely storing fMRI and DTI scans of brain tumor patients. Contained >200 patients' data in structured and searchable form.

TECHNICAL SKILLS

Platforms: Appian Business Process Management Suite, Ruby on Rails
Languages: Ruby, Javascript, Java
Front-end: jQuery, Bootstrap, HTML, CSS, SASS
Databases: MySQL, Oracle, DB2, PostgreSQL
