Email: sohail.shaikh@verizon.net

OBJECTIVE

Seeking independent IT management consulting and intellectually challenging opportunities within Federal, State agencies and private sector clients where broad experience, critical thinking, creativity, problem solving skills, integrity and proven abilities in: a) managing large complex mission-critical IT programs, b) Systems Engineering & Integration, c) developing Enterprise Architecture and IT investment strategy, d) managing and re-engineering business processes would be valuable

PROFILE & SUMMARY OF QUALIFICATION

- 25+ years of progressive US and international experience as a result-oriented program & project manager, IT consultant, systems architect & engineer, application programmer and an electronics engineer
- Supporting Federal agency clients since 2005, Internal Revenue Service, Department of Defense, …
- Extensive experience in Information Technology Management, Consulting, IT Infrastructure Engineering, Systems Engineering & Integration, IT investment strategy development, computers systems (legacy and modern), programming and technology trends
- Certified Project Management Professional (PMP), working towards PgMP
- Successfully led several full lifecycle software development projects in Federal government and commercial sector utilizing broad experience and skills in technology, business analysis, planning, managing, budgeting, optimum resource allocation and execution
- Excellent communication and negotiation skills with all levels of stakeholders
- Experience in software product market analysis, development and features rollout in a competitive US and international markets
- Proficient in business needs, requirements analysis, problem identification and architecting cost-effective software solutions utilizing latest software technology and development methodologies
- Skilled in business process re-engineering and workflow automation using COTS BPM products
- An effective high-performance team builder and mentor
- Familiar with intercultural communication and business practices in various parts of the world; traveled to and worked with international clients and development teams in the United States, United Kingdom, France, Germany, Pakistan and Saudi Arabia
- US Citizen, granted interim Secret Clearance by DoD/DISA and DOJ, active MBI at Treasury/IRS

CORE COMPETENCIES

Program & Project Management / EVM	• Enterprise Architecture / CPIC / E-300s
Software/Systems Engineering Management/SDLC	Software Product Development
Business Process Management / Lean Six Sigma	Professional Services Operations/Consulting
	Microsoft, Sun, Oracle Technologies

SELECTED ACHIEVEMENTS

2007- date Supporting IRS Enterprise Architecture Affordable Care Act Program for IRS EA Office, led the system architecture and logical design development for the Coverage Data Repository (CDR), Information Sharing & Reporting, ACA Verification Service (AVS), Information Returns Database (IRDB) and other projects within ACA Program, contributing in ACA Program Solution Architecture; engaged and helping Solution Engineering with detailed design, assisting Solution Engineering IRS PMs with critical aspects of the program for compliance; Architected PTIN Security Code solution for Return Preparer Office, the solution integrated Return Preparer System and Modernized

eFile to protect professional tax return preparers; Supported IRS Infrastructure Architecture & Engineering/Platform Engineering branch for modernization programs such as Modernized e-File (MeF), Federal Student Aid-Data (FSA-D), Internet Customer Account System (ICAS), Return Preparer Initiative (RPI) and RUP/EUP portal enhancements (ICPI-x); helped senior IRS managers manage infrastructure projects through project planning, coordination, tracking, and reporting, participate in infrastructure architecture development in support of various projects, participate in requirements engineering; contributed in the prototype design and managed MeF Portal-to-Backend Communication prototype project

2009 Provided SME support to the DoD/OASD-HA/TRICARE Management Activity (TMA) in developing an integrated Contract Management Information Database 2 (CMID2) combining CMID database and Vendor Cost Collection (VCC) legacy systems which provided post-award contract cost tracking capabilities; developed solution architecture documented as DoDAF views aligned with Military Healthcare System (MHS) Enterprise Architecture

2007 Supported HSPD-12 Program at the Department of Justice-Office of CIO; provided IV&V, technical analysis and project management support with the solution architecture, production deployment and troubleshooting; developed department-wide Identity Management solution strategy

2006 Supported a $23M ($5M subcontract) Enterprise Business Modernization program at DoD/DISA/PL-DITCO for Appian and contributed in Enterprise Architecture (DoDAF), analyzing and consolidating end-to-end core procurement business processes, value stream mappings, and designing customized eProcurement solution around Appian BPM suite; core member of the EBM program management team and helped developed project management plans and budgets

2004-2006 Successfully led a mission-critical program task to migrate 300GB+ legacy data into the new eRulemaking system developed by Lockheed Martin; won *eGov 2005 Certificate of Excellence* for the accomplishment

2004 Established formal software engineering and project management processes for Actix–US; streamlined and coordinated development cycles with Actix–UK which resulted in increased software quality, on-time releases and reduction in development cost

2003-2004 Asked to lead and manage technically complex projects and difficult customers to automate and re-engineer business processes in US and Europe, finishing them with complete customer satisfaction, directly affecting the clients as well as the revenues for Professional Services while working for HandySoft Global

2002-2003 Analyzed market needs with Sales and Marketing to design new BizFlow features while working for HandySoft, which helped increase sales and services revenues

2001-2002 Led Solutions Development team and transformed it into Professional Services group developing business process automation solutions for various clients, contributing in revenue increase from initial six digits a year to over $5 million in four years period; promoted three times for outstanding performance

1998-2000 Led the team to replace IBM mainframe application with a Documentum-based publishing system, projected operational cost saving and productivity increase in tens of millions of dollars over the life of the new system

1992-1997 Established and managed software development department at Cornet Technologies; designed and developed associated hardware control applications for US and European markets, adding thousands of dollars in additional revenues through software sales and maintenance

1988-1992 Successfully designed, developed and managed a custom data acquisition network for vehicle inspection computers that increased the vehicle inspection production by 30% while working for OMACO-MVPI in Saudi Arabia; promoted to manage Electronic Support Unit, responsible for all inspection stations across the country including all vehicle inspection electronic equipment and industrial computers with system availability above 97.9%

PROFESSIONAL HISTORY

BITHOP SYSTEMS, Inc., Springfield, VA
11/2007 – Present
PRINCIPAL CONSULTANT

- As an Enterprise Architect, supporting IRS Enterprise Architecture Office (EAO) developing architectures for Affordable Care Act (ACA) Program projects, assisting Solution Engineering with logical design and physical design; led Coverage Data Repository (CDR) and Information Returns Database (IRDB) architecture and guided the detailed design; contributed in the ongoing development of ACA Program Solution Architecture led by Deloitte; contributed in the architecture of ACA Verification Service (AVS), a key component for ACA compliance; developed and published EA Guidance (EAGs) for reusable architecture patterns
- Supported IRS Infrastructure Architecture & Engineering Director and senior branch management for various infrastructure modernization programs such as MeF, ICAS, RPI, FSA-D, ICPI-x; provided program management support to IA&E Project Manager and the Director; developed and maintained project dashboard and submitted other regular reports; provided program management support for ICAS, Modernized eFile (MeF), IRS public-facing and internal portals (RUP/EUP) and secure authentication programs for a successful implementation by coordinating with PRIME, external and internal teams/subcontractors, internal IRS organizations and other project managers and task leads; primary liaison between infrastructure and application development teams for MeF, providing technical oversight, GEL reviews for vendors on behalf of IRS; develop regular executive briefings/reports; participated in the development of next generation IRS IT infrastructure; successfully led MeF Portal-to-Backend Communication prototype project which MeF program plans to incorporate in the next release
- As a BPM and Appian Enterprise COTS product SME, provided solution architecture and design support to DoD/OASD-HA/TRICARE Management Activity, analyzed legacy CMID and VCC systems to be integrated, architected and implemented around Appian Enterprise BPM Suite to provide post award contract tracking capabilities, document the solution architecture as DoDAF views compliant with MHS EA
- Operating a profitable and growing SBA certified 8(a) small business serving Federal clients; small business partner with Booz Allen Hamilton on Treasury TIPSS-4 IDIQ, recently won a 4.5 year EA subcontract with BAH

EMENTUM, Inc., Bethesda, MD
3/2007 – 11/2007
DIRECTOR

Supported HSPD-12 PMO at the Department of Justice/Office of the CIO as the Technical Architect and Project Manager on the HSPD-12 program; responsibilities include providing strategic technical analysis, direction and developing the solution architecture for DOJ HSPD-12 PMO, performed gap and risk analysis of the GSA/EDS HSPD-12 GOTS managed service, developed DOJ AS-IS and TO-BE Clearance Processing business process models, IV&V of the GSA solution, managed HSPD-12 IdMS, LACS, PACS, biometrics systems, and enterprise business architecture workstreams and architecture alignment with DOJ FEA-compliant Enterprise Architecture using Sparx Enterprise Architect, performed HSPD-12 requirements analysis for DOJ and managing the technical team.

APPIAN CORPORATION, Vienna, VA 3/2006 – 3/2007
PROGRAM MANAGER

- Led Appian Government Acquisition Management packaged product development program, performed strategy planning for the feature roadmap and P&L with CEO, CTO and Sales/Marketing, develop detailed feature specifications and LOE estimations, coordinated with engineering and QA teams on the implementation, scheduling and resources allocation
- As the Lead Consultant, contributed to a $23M ($5M subcontract)/3-year Department of Defense DISA/DITCO Enterprise Business Modernization Program providing expertise in Enterprise Software Architecture development (DoDAF, Net-Centric, XML Registry) using Telelogic System Architect, Procurement solution implementation using Appian Enterprise BPM Suite with emphasis on legacy system integration, BI/process performance improvements and ease of use, SOA and Web Services integration through BEA AquaLogic ESB

LOCKHEED MARTIN, Arlington, VA **5/2004 – 3/2006**

SOFTWARE ENGINEER STAFF & ETL TASK LEAD

- Successfully managed the legacy data migration (ETL) task meeting all deadlines and program goals for Lockheed Martin eRulemaking Program for EPA
- Coordinated with candidate Federal agencies (EPA, DHS, APHIS, etc.) on data issues such as attribute mapping, transformation and validation
- Streamlined the process, migrated and validated 300GB+ data for the first five Federal agencies within 48 hours as tasked
- Acting manager in permanent department manager's absence, handling all day-to-day departmental activities and issues
- In-house subject-matter expert (SME) in Business Process Management and HandySoft Workflow platform for Lockheed Martin at USPTO SDM Program
- Fine-tuned BizFlow servers for high transaction volume trademark (Madrid Protocol) case loading
- Identified and eliminated trademark process bottlenecks

ACTIX, Reston, VA
1/2004 – 5/2004

SOFTWARE DEVELOPMENT MANAGER

- Implemented software development processes to increase timely delivery and product quality
- Synchronized wireless product release cycles with UK ensuring schedule conforms to US market needs
- Provided a better visibility of the US development team to the UK executives
- Contributed in the product feature development and configuration management

HANDYSOFT GLOBAL, Vienna, VA **8/2001 – 1/2004**

TECHNICAL PROJECT MANAGER

- Led and managed several technically complex business process automation, systems integration and software development projects using BizFlow workflow product using DMAIC methodology
- Responded to RFPs, gathered and analyzed customer needs, designed solutions, planned and allocated resources to meet the project goals, deadlines and budgets
- Analyzed market needs with Sales/Marketing and designed BizFlow product features which led to considerable increase in sales and existing customer satisfaction
- Helped QA develop test cases
- Introduced formal code inspection process to reduce software defects and the associated rework costs
- Led, managed and mentored a team of six software engineers to handle increasingly complex workflow solutions for the customers, a team which later became the Professional Services department
- Conducted bi-yearly performance reviews, webinars and mentoring sessions for new product features
- Developed several full-functional out-of-the-box workflow solutions
- Launched fully integrated customer portal to allow customers to access product knowledgebase
- Designed and deployed several internal automated business processes e.g. Time Sheet, Expense Report

PRINCETON OPTICAL NETWORKS, Greenbelt, MD
8/2000 – 8/2001

SENIOR MEMBER TECHNICAL STAFF

- Researched, designed and implemented hierarchical, distributed services-based NMS Connection Provisioning Service to control switches provision optical paths using various wavelengths
- Researched and implemented OSPF and 'k-Shortest Path' routing algorithms optimized for optical wavelengths

LEXIS-NEXIS/CIS, Bethesda, MD
2/1998 – 8/2000

SENIOR SOFTWARE ENGINEER & TECHNICAL LEAD

- Architecture of new publishing system based on Documentum EDMS with a 1TB+ content repository
- Discovered user requirements and AS-IS publishing processes
- Develop use cases and TO-BE processes
- Designed several proof-of-concept prototypes

INTERACTIVE TELEVISION COMPANY, Arlington, VA
8/1997 – 2/1998
SOFTWARE ENGINEER
- Contributed in the design of Naval Warfare Control System for US Navy AEGIS destroyers

CORNET TECHNOLOGIES, Springfield, VA 3/1993 – 8/1997
SENIOR SOFTWARE ENGINEER & TECHNICAL LEAD
- Designed and developed flagship software product CorScan to control datacom products
- Established the software development department including software QA and release processes
- Developed several custom data communication control and monitoring systems for US and European customers

OMACO-MVPI, Riyadh, Saudi Arabia
1/1988 – 10/1992
MANAGER – ELECTRONIC SUPPORT UNIT
- Oversaw 13 inspection stations computers, LAN, electronic equipment across the country
- Supervised 13 technicians from the head office and kept all electronic equipment uptime above 97.9%
- Analyzed feasibility, proposed to the executives and designed a PC-based data acquisition network to replace DEC PDP-11s that resulted in more than 30% increase in production capacity and revenues

DIGITAL COMMUNICATIONS, Ltd., Karachi, Pakistan
3/1986 – 1/1988
SERVICE ENGINEER
- Maintained PABX and electronic systems developed and deployed by the company
- Maintained/repaired GE/EMI CAT Brain Scanner based on DG Eclipse S/200 minicomputer
- Maintained/repaired Citibank banking computer peripherals

EDUCATION

- MBA, 2005 — University of Maryland University College, MD
- BS in Computer Science, 1999 — George Mason University, VA
- AS in Industrial Electronics, ranked 1st, 1986 — Pak-Swiss Training Center, Karachi, Pakistan
- AS in Instrument Technology, ranked 1st, 1983 — Pak-Swiss Training Center, Karachi, Pakistan

CERTIFICATIONS & TRAININGS

- CompTIA Security+, CBTExpress (2014)
- Schedule & Cost Control, ESI International/George Washington University (2013)
- Agile Projects, ESI International/George Washington University (2012)
- Applied Earned Value Management, ESI International/George Washington University (2010)
- Enterprise Architecture, ESI International/George Washington University (2009)
- Program Management, ESI International/George Washington University (2008)
- PMP, Project Management Institute (2007)
- MS Project 2003, NOVA Community College (2006)
- Appian Enterprise BPM Suite, Appian (2006)
- EMC Documentum, EMC (2005, 1997)
- HandySoft BizFlow, HandySoft (2001)

- Benzai MVPI System, Mitsushita/Benzai, Japan (1990)

CLEARANCES

- DoD – Interim Secret (2006)
- DoJ – NACI/Public Trust (2007)
- IRS – MBI / Public Trust (active)

APPENDIX A – SKILLS SUMMARY

Management

- Enterprise Software Development Program Management/Project Management
  - Feasibility Study, Cost Estimation and Break-Even Analysis, Capital Planning Investment Control (CPIC/E-300)
  - Earned Value Management
  - Resource Allocation Planning & Scheduling
  - Integrated Risk Management for technology, schedule, cost and resources
  - Scope and Deliverables Management and IV&V
- Product Development, Features Roadmap and Market/Competition Analysis
- Professional Services Management
  - Client-interfacing, requirements solicitation, analysis and engineering, use case development
  - Response to RFP, RPQ and RFI
  - Technology Solutions Development
  - Project Management
- Executive PowerPoint presentations and briefings
- Business Process/Workflow Engineering
  - 'AS-IS' Business Process Discovery/Capture
  - 'TO-BE' Business Process Re-engineering
  - Lean Six Sigma/DMAIC methodology, VSM, SIPOC, etc.
- Staff development and mentoring, performance reviews, status reporting, budgeting and operational cost control

Engineering

- Enterprise Architecture development (DoDAF, FEAF, Zachman, SOA and others) [IBM Rational/Telelogic System Architect, Sparx Enterprise Architect, MS Visio, Rational Rose]
- Business Process Management (BPM) and Lean Six Sigma (DMAIC) [BPMN, BizFlow, Appian, MS Visio]
- Enterprise Content Management (ECM) and legacy data migration (ETL) [EMC Documentum, MS SharePoint]
- Organizational analysis and software engineering process implementation
- Use case discovery and analysis; object-oriented analysis and development [Visio]
- Computer Programming, Software Engineering
- IV&V planning and execution (IEEE Std 1012)

Programming C, C++, Java, Visual Basic, SQL, FoxPro, Prolog, LISP, Assembler (i80x86, i8051, Z80), ASN.1

Operating Systems MSDOS, Windows, Linux, Solaris, HP-UX, RTXC, RTKernel

Hardware IBM PC, i80x86, Z80, i8051, HP64000, DEC PDP-11/73, PDP-9, Ethernet, SNMP, RS-232, RS-422, embedded systems (data communications and controls)

Environment COM/DCOM/ActiveX, MTS, CodeBase, MS Access, Oracle 8/9/10g, SQL Server 7/2000, JET, DAO, ADO, Visual Studio, Visual SourceSafe, HP OpenView, IBM NetView, CastleRock SNMPc, TCP/IP, sockets, STL, ATL, RUP/ICONIX, UML, ASP, JSP, J2EE, .NET, JSDK 1.4, Jini, Jiro, XML, XSLT, SOAP, SOA, Web Services, WSDL, UDDI, Apache Axis, Oracle Application Server, IBM WebSphere, BEA WebLogic, JBuilder, Oracle JDeveloper, Oracle AppServer, Eclipse, HandySoft BizFlow 2000/7/8, EMC Documentum, DFC, DQL, Appian Enterprise BPM Suite 5.3
