EXPERIENCE

Designation : Team Lead, 06/2007 to Current

Employer : Accenture – Charlotte, NC

- As Business Process Specialist designed and implemented business processes for different approval workflow in LEO (Legal Entity On-boarding - Capturing KYC details for Global Customer), Master Client Database (Capturing KYC details for US Clients), eXpedite (Global Markets Sales Tracking Tool) and Due Diligence (Perform due diligence on Whole Credit Client's Loan/Deal Request) for Bank of America.
- Worked as Integration Architect to build Mule Flows and integration components for Bank Vehicle Loan and IBUS to Mule Conversion projects with State Farm Client.
- Been in to L3 technical production support for Bank of America GCIB LOB applications and leading teams in near shore/offshore to support Maximo tickets for all 3 regions.

Role at Client Place : Project Lead, 12/2013 to Current

Client : Bank Of America – Charlotte, NC

- Worked closely with clients/business and partners to establish problem specifications and system designs for complete end to end Appian Application to perform Due Diligence on Credit/Loan Request for Whole Sale Credit Clients
- Rolled out very first Appian application in the month of May for Bank of America - CIP Group.
- Completely build/designed all UI screens using new SAIL feature introduced in Appian 7.4
- Upgraded 7.4 Appian application with 7.5 version and re-factored the UI components with updated SAIL specification to retain the same look and feel for upcoming August Release
- Implemented complex business rules in Appian for determining the questionnaire logic with Appian expression language.
- Responsible for Appian Business Process deliverable along with upstream/downstream integration for May, August and November release scopes.

- Created Appian System process to cache drop-down label/value across platform.
- Implemented web services call from both SAIL and Smart node for system integration.
- Data Management activities : CDT design, Datasource, query rules, JPA Annotation to define relationship.
- Reviewed and Implemented various best practices for code and build activities.
- Create/ Review / Update Appian Application Architecture Document with the design patterns identified
- Translated all fulfillment ARIS business processes in to Appian Business Process for simulation and to optimize the business process configuration
- Worked with Appian professionals to review the architecture and code for better quality
- Review QC tickets for proper classification and assigning to right team for resolution

Role at Client Place : Integration Architect, 09/2012 to 11/2013

Client : State Farm – Bloomington, IL

- Worked closely with DC2 Bank LOB Business Analyst and Tech Arch Team to identify the Services and UI Components for Bank Vehicle Loan Application.
- Involved in IBus to Mule Service Re-engineering
- Created 7 Mule Services for State Farm Bank CDE program to delegate the account services provided by other vendors FIS, TSYS and other Legacy application.
- Created functional and unit test case scenario for all 7 mule services and executed them using SOAP UI/Junit Test Suite
- Produced Technology Architecture deliverable such as physical/logical system topology , application distribution, Service Dependency, Service to UI and Service Inventory List documents for both Bank Vehicle loan and IBUS to Mule Re-Engineering projects.
- Created requirement documents for Mule Services from existing IBUS services code.
- Produced Logical Interface document to establish mapping/trace ability with service element canonical mapping
- Implemented various service design patterns - Service Aggregation,facade, messaging and transformation etc .
- Created Master XSL to abstract the individual XSL translation used for various services at runtime.

Role at Client Place : Team Lead, 07/2003 to 08/2012

Client: Bank of America – Charlotte, NC

- Designed the Business Process for KYC approval workflow with interactive activity implementation in ALBPM 5.7.0 and 6.0.5 for Legal Entity On-boarding (LEO) and Master Client Database (MCD) Applications.
- Designed the Business Process for Sales Pipeline Credit Approval request created by Global Market Sales Associates in ALBPM 5.7.0 and later migrated the application to ALBPM 6.05.
- Customized ALBPM Inbox View for Clients using JSP and JSF for 5.7 and 6.0 versions respectively.
- Customized Email Templates and SLA with XML templates.
- Implemented Error/Exceptional handling in Business Process implementation for all 3 projects during this tenure.
- Implemented Customized Request Search for RDS user with elevated access level permission.
- Was leading L3 technical support team operating from near-shore and offshore for 3 applications (LEO,MCD and Expedite) to cover all 3 regions.
- Improved various BAU activity process to adhere with bank compliance and to increase productivity.
- Managing Issue tickets and Problem tickets in Maximo Tool (Support ticket tracking tool in Bank of America) along with QC defect fixes for production defects.
- Was exploring DROOLS and WL Cluster implementation in ALBPM 6.0.5 Business Process Implementation.

Designation : Software Engineer/Team Lead, 06/2000 to 06/2003

Previous Employer : K- Corp Services – Bangalore India

- Worked in this firm as lead software engineer for designing the data model for business objects and associated views for any new requirements.
- Responsible for reviewing the developers code and updating the build for any patch/future release.
- Involved in Knowledge transitioning the product's end to end Implementation to Partnership company SRIT (Sobha Renaissance IT).
- Created a POC application to migrate existing client's information from J2 to T7 Fastobject database.
- Mapped T7 fastobject ODBMS objects to Mictosoft SQL server using ORM specification provided by fastobject.

EDUCATION

Bachelor of Engineering: Information Technology, 2003

P S R Engineering College - Madurai, India

ADDITIONAL INFORMATION

- Completed Partner's Advanced Application Design Boot Camp Training provided by Appian Trainers in Appian Headquarters.
