

Ramar Narayanan

Mobile #: +1-479 282 5977
Email : ramar.ind@gmail.com

SUMMARY:

Ramar Narayanan is an award-winning leader of technical teams delivering technology solutions to fulfill client goals. Ramar possesses 9+ years of IT experience including 5+ years in BPM full life cycle of requirement analysis, design, application maintenance, functional studies, testing, release management, and bug fixing. Also experienced in utilizing all versions of IBM BPM/Lombardi Teamworks as well as Web Technologies, experience in integrating BPM applications with other applications using inbound and outbound capabilities and messaging mechanisms.

TECHNICAL COMPETENCIES:

IBM WebSphere/SOA

- Business Process Management: IBM BPM v7.5, v8.0, v8.5, Websphere Lombardi Edition v7.1, v7.2 and Lombardi 6.x
- IBM Blueworks Live

J2EE/Development/UI

- Java
- JSP
- HTML
- CSS
- XML
- JavaScript
- AJAX
- Web Services and JMS Integration
- Web/REST APIs
- BIRT

Databases/App Servers

- Oracle
- SQL Server
- DB2
- IBM WebSphere and BEA WebLogic

Application and Tools

- RAD
- Eclipse
- Tline
- Toad
- BIRT

Project Management

- Microsoft Project

PROFESSIONAL EXPERIENCE:

Prolifics Inc., March 2013 – Present

Broadcast Music Inc.,

- Participated in technical design discussion and business discussion to ascertain the business and functional requirements
- Involved in overall design and architecture of the IBM BPM applications in BMI
- Designed and developed IBM BPM components: process modeling, service modeling, integration components and reports as dashboards
- Designed inbound web services and integrating BPM application with other applications using inbound and outbound web service integrations and messaging mechanism.
- Debugged and solved any performance issues with application as well as server side according to the IBM suggestions
- Provided technical solution to the BPM team and demonstrated ability to lead technical teams and to deliver customer needs in terms of technology solutions
- Responsible for design and implementation of reusable toolkits and Coach views
- Created various types reports in IBM BPM and exposed as dashboards
- Handled the playback sessions with business and various participants on each sprint
- Worked closely with Project Leads, architect during design, reviews, approvals and coordinated issues with various team
- Performed code reviews to validate if they were adhering to the rich standards and following best practices
- Provided offshore-onsite coordination
- Coordinated the deployment process with change control management team for deploying solutions to runtime servers
- Communicated the project status and issues with respective leaders
- **Technologies Used:** IBM BPM 8.0 Advanced, Web Services, IBM WebSphere Application Server, Java, JSP, XML, JavaScript, Oracle and DB2

Horizon Blue Cross Blue Shield of New Jersey, Healthcare Project

- Participated in technical design discussion and business discussion to ascertain the business and functional requirements
- Involved in overall design and architecture of the IBM BPM applications in Horizon BCBSNJ which provides claim auditing solution for Auditors and claim Processors with accuracy values
- Designed and developed IBM BPM components: process modeling, service modeling, integration components and reports
- Designed inbound web services and integrating BPM application with other applications using inbound and outbound web service integrations and messaging mechanism.

- Provided production support and handling enhancements and defect fixing
- Debugged and solved any performance issues with application as well as server side according to the IBM suggestions
- Provided technical solution to the BPM team and demonstrated ability to lead technical teams and to deliver customer needs in terms of technology solutions
- Responsible for design and implementation of reusable toolkits
- Worked closely with Project Leads, Architect during design, reviews, approvals and coordinated issues with various team
- Performed code reviews to validate if they were adhering to the rich standards and following best practices
- Provided offshore-onsite coordination
- Coordinated the deployment process with change control management team for deploying solutions to runtime servers
- **Technologies Used:** IBM BPM 7.5.1.1 Advanced, WPS 7.5.1.1 WESB 7.5, Web Services, IBM WebSphere Application Server, IBM Lotus Notes, JSP, XML, JavaScript, BIRT Reporting and DB2

Cognizant Technology Solutions, March 2010 – Feb 2013

StubHub Technology Solutions

- Involved in overall design and architecture of the IBM BPM application for this online marketplace owned by eBay, which provides services for buyers and sellers of event tickets
- Participated in technical design discussion and business discussion to ascertain the business and functional requirements
- Responsible for installation, configuration, deployment and problem resolution of IBM BPM and Lombardi Teamworks
- Designed and developed IBM BPM components: process modeling, service modeling, and integration components
- Migrated the Lombardi Teamworks 6.1 application to IBM BPM v7.5.1
- Designed inbound web service and integration with outbound Web services
- Generated database scripts as per diagram
- Integrated IBM BPM with eCom and Siebel using outbound capabilities and messaging mechanism
- Debugged and solved any performance issues with application as well as server side according to the IBM team suggestions
- Worked closely with Project Leads and Architect during design, reviews and approvals
- Responsible for design and implementation of reusable toolkits
- Performed code reviews to validate if they were adhering to the rich standards
- Provided offshore-onsite coordination
- Coordinated the deployment process with change control management team for deploying solutions to runtime servers
- Communicated the project status and issues with respective leaders
- **Technologies Used:** IBM BPM 7.5.1 and Teamworks 6.1, UNIX, IBM WebSphere Application Server, RSA, Java, JSP, XML, JavaScript, Java Web Services and Oracle

Wal-Mart Stores Inc., Retail Project

- Participated in technical design discussion and business discussion and understood business and functional requirements
- Responsible for installation, configuration, deployment and problem resolution of IBM BPM and Lombardi Teamworks
- Designed overall architecture of the application
- Designed and developed IBM BPM components: process modeling, service modeling, and integration components
- Migrated the Lombardi Teamworks 6.1 application to IBM BPM v7.5.1
- Designed inbound Web service and integration with outbound Web services
- Generated database scripts as per diagram
- Worked closely with Project Leads and Architect during design, reviews and approvals
- Responsible for design and implementation of reusable toolkits
- Performed code reviews
- Provided offshore-onsite coordination
- Coordinated the deployment process with change control management team for deploying solutions to runtime servers
- Responsible for troubleshooting and resolving issues
- Communicated project status and issues with respective leaders
- Responsible for business process enhancements and playbacks with the customers
- **Technologies Used:** IBM BPM 7.5.1, UNIX, IBM WebSphere Application Server, RSA, Java, JSP, XML, JavaScript, Java Web Services, SQL Server 2008 and DB2

Coty, Inc., Retail Project

- Gained an understanding of the business processes and technical requirements and translated these to team members
- Completed preparation of the design document and implementation of the business process
- Developed reusable components and integration components
- Performed code reviews to validate if the codes adhered to functional and technical requirements
- Maintained communications with the onsite and offshore team members, technical managers, and other team members
- Coordinated the deployment process with configuration management team
- Performed troubleshooting activities and performance analysis of various processes and services using process monitor in Process Admin console
- Completed performance tuning and resolved performance issues
- Provided post production support
- **Technologies Used:** Lombardi Teamworks 6.1, UNIX, IBM WebSphere Application Server, Java, JSP, XML, JavaScript, JMeter, IBM Tivoli, CA Wily and Oracle Database

CVS Caremark, Healthcare Pharmacy Project

- Understood business requirements, preparation of the design document and implementation of the business process

- Maintained communications with the onsite and offshore team members, technical managers, and other team members
- Developed common reusable components
- Retrieved next available tasks using API's without login to the Teamworks portal
- Performed code reviews to validate if the UI screens were adhering to the rich business standards
- Integrated Java Web services with Teamworks
- Performed troubleshooting activities and performance analysis of various processes and services using process monitor in Process Admin console
- Coordinated the deployment process with the configuration management team
- **Technologies Used:** Lombardi Teamworks 6.2, UNIX, IBM WebSphere Application Server, RSA, Java, JSP, XML, JavaScript and Oracle Database

Mahindra Satyam, August 2007 – March 2010

Pfizer, Inc., Healthcare Pharmacy Project

- Understood the business and technical requirements and translated to team members
- Involved in requirements understanding of the functional specification
- Prepared the design document and implementation of the process flow
- Maintained communications with the team members, technical managers, and other team members
- Coordinated the deployment process with the configuration management team
- LDAP configuration settings/group maintenance
- **Technologies Used:** Lombardi Teamworks 6.1, UNIX, BEA WebLogic Application Server, Java, JSP, XML, JavaScript, JCAP interface and Oracle Database

Polaris Software Lab Ltd., December 2006 – July 2007

Bajaj Auto Finance Ltd., Banking Project

- Analyzed the functional specifications with team members
- Designed and handled lead and data entry module and integration
- Generated Data Access Object for various modules
- Involved in coding for populating details through the servlet
- **Technologies Used:** Java, JSP, Struts, Oracle9i, Tomcat 4.0, Java Script, Workflow, Tline and WebLogic v8.1

Altius Infosystem Pvt Ltd., April 2004 - December 2006

- Involved in requirements understanding of functional specification
- Developed the user interfaces to populate the details

Technologies Used: Java, JSP, Oracle, Java Script, WebLogic Application Sever

PROFESSIONAL CERTIFICATIONS:

- IBM Certified BPM Application Developer - Business Process Manager Express or Standard Edition v7.5.1
  IBM Certified Associate BPM Developer - BPM Blueprint; WebSphere Lombardi Edition v7.1
- Cognizant Certified Professional BPM Developer
- Certified in networking in Linux

EDUCATION:

Education

- Bachelor of Engineering, in Electronics and Communication Engineering, from Periyar University, Tamil Nadu, India

Training

- IBM BPM/Lombardi

AWARDS/ACCOMPLISHMENTS:

- Received an award for implementation excellence, 2012 from Wal-Mart Stores Inc.
- Received an award for implementation excellence, 2012 from Cognizant Technology Solutions for Wal-Mart Stores Inc. implementation.
- Received an award for Lombardi Teamworks performance tuning, 2010 from Cognizant Technology Solutions for Coty Inc. implementation.
- Followed the best practice of recording the requirements in the Requirement Traceability Matrix (RTM), which guaranteed all requirements were met against the test cases and no observations were reported during audits conducted for the projects

LANGUAGES:

- Fluent in English and Tamil
