

Curriculum Vitae

YOGESH KUMAR

E-MAIL -- NAIN.YOGESH@GMAIL.COM +1-408-368-6210

SUMMARY

- Having 9+ years of Java/J2EE, Spring, Hibernate and WebServices SOAP (JAX-WS) & Restful (JAX-RS), EJB, JMS exp.
- Architecting, Design and Programming in medium to large scale projects in the Telecom, E-Commerce and Banking.
- Played pivotal role as an architect in large-scale infrastructure migration projects.
- Research and development of new technologies for the team members and company benefits.
- Have very good analytical thinking and hands-on in Java technology, took up coding for critical use cases in all the projects involved.
- Played major role in requirement gathering phase of many projects. Iteratively refines requirements based on feedback from business, development and test teams.
- Providing estimates for RFP.
- Good in Team Management and Leadership skills.
- Have multi-regional experience spanning USA, South Africa, Holland.
- Worked extensively on **Hibernate, Struts MVC, Spring Core, Spring MVC, Spring Transaction, Spring DAO, Web Service SOAP & Restful, EJB,** Web 2.0 technologies like JQuery technologies and has a sound knowledge of PL/SQL, RDBMS like Oracle.
- Expertise in technical documentation, providing analysis / estimates, handling client communication and gathering user requirements.
- Excellent Communication skills and leadership qualities.
- **Presently worked as Lead / Architect in Accenture**.
- I am Sun Certified Java Programmer (**SCJP**) and Web Component Developer (**SCWCD**).
- **Having H1B visa.**

SKILLS SUMMARY

Technologies	Java, J2EE
Languages	**Primary Skills**: **Java, J2EE, Struts, Spring 2.x & 3.x, Hibernate 3.x, WebService SOAP (JAX-WS), Restful (JAX-RS), WSDL, Servlets, JSP, EJB, JMS, JDBC, XML, JAXB, XSD, Tiles Framework, DesignPatterns.**
	Secondary Skills : HTML, JavaScript, JQuery, Oath 2.0 protocol, Maven, SVN, PMD, SoapUI
Operating Systems	**Primary Skills** : Windows Server
Middleware Servers	**Primary Skills**: Weblogic 12c, JBOSS 5, IBM Websphere 6
Databases	MY SQL, Oracle 9i, 11g
Tools	SQL Devloper, SoapUI, SVN, Eclipse, SQL yog, Oracle Toad, Maven, PMD

Frameworks	Struts, Hibernate 3.x, Spring 2.x & 3.x

CERTIFICATIONS

- **SCJP (Sun certified java programmer).**
- **SCWCD (Sun certified web component developer).**

EDUCATIONAL QUALIFICATIONS

- Master of Computer Application's (M.C.A) from U.P Technical University , India.
- Bachelor Of Commerce (B.Com.) from C.C.S University, India.

EXPERIENCE SUMMARY

Accenture (CMMI 5 COMPANY) **(APR 2013 TO TILL DATE)**
Infogain Corporation. (CMMI 5 COMPANY) **(APR 2012 TO MAR 2013)**
Zensar Technologies Ltd. (CMMI 5 COMPANY) **(SEP 2011 TO FEB 2012)**
TechMahindra Ltd. (CMMI 5 COMPANY) **(MAR 2010 TO AUG 2011)**
CAPGEMINI INDIA PVT. LTD. (CMMI 5 COMPANY) **(MARCH 2007 TO FEB 2010)**
NIIT LTD. **(NOV 2006 TO FEB 2007)**
WEBVIRTUE SOFTWARE SOLUTIONS. **(JUL 2005 TO OCT 2006)**

ACCENTURE (LEAD / ARCHITECT) (APR 2013 TO TILL DATE)

Project#1

Title : **EFM Survey**
Duration : May 2013 to Feb 2014.
Team Size : 5
App Server : WebLogic 12c
Development :J2EE, SPRING, Hibernate, SOAP Web Service (JAX-WS) & Restful (JAX-RS), XML, WSDL, XSD, VIVOCI, Maven, Sonar.
Database : Oracle PL&SQL
Role : Lead and Architect

Summary : This project related to Apple Survey, which come after completing chat on Apple site. Our project generate Apple surveys and captured their answers as well as, these surveys related to Apple Care and AOS. We use third party tool VOVICI for survey generation. We also integrate with other Apple accounts like Account Manager, COP, iTranslate etc.
We use Restful Web Service (JAX-RS) to integrate with AM, COP and iTranslate.

Responsibilities

- Involved in Analysis, Design and Architecture of the project etc.
- Hands-on development on the critical use cases.
- Review and integrate all application requirements, including functional, security, integration, performance, quality and operations requirements.
- Review and integrate the technical architecture requirements. Provide input into final decisions regarding hardware, network products, system software and security like InfoSec Review, precut over activities, code reviews etc.

- We use Restful Web-Services (JAX-RS) for integrating from Acoount-Manager, Translate, and COP.
- Designed the persistence layer of the application, using Spring and Hibernate.
- We use Spring core framework, Hibernate Dao for connecting to Database.
- We also expose our API's as Web Services using JAX-RS and JAX-WS
- Ensure good quality of code and adherence to overall architecture by ensuring the framework/tools like Junit framework, Sonar, etc. are used and code review is done strictly.

INFOGAIN CORPORATION. (ASSISTANT MANAGER) (APR 2012 TO MAR 2013)

Project#2

Title	: **NetApp University**
Client	: NetAPP Inc. (USA)
App Server	: WebLogic
Development	: J2EE, JSP, Hibernate, Spring Core, Spring MVC, Web Service (JAX-RS), JAXB, XSD, JSON, Tiles Framework
Database	: Oracle PL&SQL
Role	: Project Lead & Architect
Summary	: This project is related to NetApp Inc. to monitor or create new partner. Partner of NetApp is linked with this so that there employee can register him/her self to take part in various course or certification. Through this we can monitor which employee of partner of NetApp done which certification or course or we can assign new course or certification to them. This application also interacts with NetApp various application through web services and also various application can access services given by this application.

Responsibilities

- Involved in Analysis, Design and Architecture of the project.
- I am Technical lead for this project and monitor team task.

- Technical understanding of the new requirements.
- Designed the persistence layer of the application, using Spring and Hibernate. Configured Spring-Hibernate for using Hibernate ORM.
- Develop client side and module in Spring MVC and JSP.
- Responsible for the whole implementation of Tiles framework by designing the various layouts.
- We implement web services using JAX-RS.

ZENSAR TECHNOLOGIES LTD. (TECHNICAL LEAD) (SEP 2011 TO FEB 2012)

Project#3

Title	: **Mutual And Fedrer Insurance**
Client	: Mutual And Fedrer Insurance (South Africa)
Duration	: Sep 2011 to Feb 2012
Team Size	: 23
App Server	: IBM Websphere 6
Development	: J2EE, JSP, Struts ,EJB , WebService(JAX-WS), Spring, Hibernate, XML, JAXB, XSD, JMS.
Database	: Oracle

Role : Tech Lead

Summary : This project provide online functionality to brokers to make insurance policies Broker Insurance agent can do policies for life, commercial, marine, industrial and vehicle through online, we migrate project from TIA environment to jave j2ee environment, we use jax-ws webservice to interact with oracle base data base actually through web service we use already make database from TIA environment.

Responsibilities

- Actively participated in developing the projects.
- Involved in Analysis, Design and Architecture of the project. Responsible for class diagram, Sequence diagram, etc.
- I am Technical lead and Architect for this project and monitor team task.
- Technical understanding of the new requirements.
- Designed the module in such a way that new changes can be easily layered on it.
- Develop server side and module in struts and jsp.
- Using EJB to provide transaction support.
- Using JMS for sending notification
- We use spring core framework, Hibernate Dao for connecting to Oracle.
- We access api for database as web services using JAX-WS.
- Breaking down a bigger project into smaller actionable modules and components, defining interfaces between them, defining & identifying business layer and presentation layer components.
- Coding critical modules of the application.
- Unit-testing the self-written code and perform code reviews. Experience with quality tools like PMD.

TECHMAHINDRA LTD. (SR. SOFTWARE ENGINEER) (MARCH 2010 TO AUG 2011)

Project#4

Title : **SAQER**
Client : Qater Goverment
Duration : Mar 2011 to Aug 2011
Team Size : 10
App Server : Jboss 5.0
Development : J2EE, JSP, Struts ,EJB , WebService(JAX-WS), Spring, Hibernate, XML, XSD, JMS.
Database : My SQL
Role : Jr. Architect

Summary : In 2022 Qatar is going to organized FIFA Football world cup, so this project is made for Qatar government to track all the development going on in Qatar, like bridge's, stadium's, public transport system etc, so through this project you can track which task is handle by whom and in what stage this task is right now, who are current assignee, list of completed task etc, I develop

server side part and using web service we expose our API'S so that IPAD client can call these API'S and show output on IPAD.

Responsibilities

- Actively participated in developing the projects.
- Involved in Analysis, Design and Architecture of the project. Responsible for class diagram, Sequence diagram, etc.
- Technical understanding of the new requirements.
- Designed the module in such a way that new changes can be easily layered on it.
- Devlop server side and admin module in struts and jsp.
- Using EJB to provide transation support.
- Using JMS for sending notification
- We use spring core framework, Hibernate Dao for conecting to MY SQL.
- We also expose our api as web services using JAX-WS.
- Breaking down a bigger project into smaller actionable modules and components, defining interfaces between them, defining & identifying business layer and presentation layer components.
- Coding critical modules of the application.
- Unit-testing the self-written code and perform code reviews. Experience with quality tools like PMD.

Project#5

Title	: **UCI (Singapore Telecom)**
Client	: Singapore Telecom
Duration	: April 2010 to Feb 2011
Team Size	: 16
App Server	: Jboss 5.0
Development	: J2EE, JSP,Struts ,EJB **,**Spring, Hibernate, Java webService(Jax-WS), XML, XSD.
Database	: My SQL
Role	: Module leader, Sr. Developer

Summary : It is a mobile application , this project deals with to develop Unified Communication Interface by which user integrate different SNS(Social Networking sites like Facebook,Twitter,Linkedin,Blogger etc) IMs (Instant messenger like GTalk, Yahoo Messenger, MSN etc) and also includes entertainment like you tube etc. We also develop blog for internal user, admin portal; we had used JAX-WS for webservise to expose our service for other user.

Responsibilities

- Actively participated in developing the projects.
- Actively participated in designing the application.
- Technical understanding of the existing system and new requirements.
- Designed the module in such a way that new changes can be easily layered on it.
- Responsible for coding Struts Framework.
- Developed user interfaces using JSP.
- Using EJB to provide transation support.
- We use spring core framework, Hibernate Dao for conecting to MY SQL.
- We also expose our api as web services using JAX-WS.

CAPGEMINI INDIA PVT. LTD. (CONSULTANT) (MAR 2007 TO FEB 2010)

Project#6

Title : **FRA – Financial Risk Analysis**
Duration : Jan 2009 to Apr 2009.
Team Size : 2
Client : Cisco (USA) Onsite
App Server : IBM Web sphere (6.0)
Development : **Core Java, J2EE, JSP, Struts, Spring, Hibernate**
Database : **oracle 10g, PL&SQL**
Role : Developer, analyst

Summary : Cisco is a US-based Software development company. Cisco is ranked 40 on the FORTUNE® 500 and is also Forbes- America's Best Managed Company. Capgemini is supporting Cisco IT in the strategic business plans to expand operations. FRA is a pilot project, through it cisco FA's can find out the best supplier for cisco company by checking supplier rating given by moody rating agency.

Responsibilities :

- Use Agile software methodology.
- Designed the module in such a way that new changes can be easily layered on it.
- Coding Struts Framework.
- Responsible for coding spring.
- Responsible for integrating spring, hibernate and struts.
- Developed user interfaces using JSP.
- Creating Unit Test Plan for the new requirements.

Project#7

Title : **TIMS – Transportation Information Management System**
Duration : Mar 2008 to Jan 2009 and June 2009 to Dec 2009
Team Size : 11
Client : Lowe's (USA)
App Server : IBM Web sphere (6.0)
Development : **Core Java**, **J2EE, JSP, Struts, PL&SQL**
Database : oracle 10g
Role : Developer

Summary : Lowe's Home Improvement Warehouse (NYSE: LOW) is a US-based chain of retail home improvement and appliance stores. Lowe's is ranked 42 on the FORTUNE® 500 and is also Forbes- America's Best Managed Company (2005 Retailing). Capgemini is supporting Lowe's IT in the strategic business plans to expand operations outside USA into Canada and Mexico. Lowes uses a 3rd party application from Manugistics for managing its freight cost and calculating the optimum delivery path between 2 locations. The input data for this application is provided through a set of Host jobs and UNIX processes. The technology involves C / Mainframe and Java. The scope of work includes: Supporting the onshore team in managing deliveries by handling the task of coding and unit testing. This also involves creation of unit test plans and reviewing the code before delivering it to the onshore team. Maintaining the earlier version of the product.

Responsibilities :

- Actively participated in developing the projects.
- Technical understanding of the existing system and new requirements.
- Designed the module in such a way that new changes can be easily layered on it.
- Responsible for coding Struts Framework.
- Developed user interfaces using JSP.
- Defect fixing during UAT support.
- Creating Unit Test Plan for the new requirements.

Project#8

Title : **Rabobank- Central Processing Loan (CPL).**
Duration : Mar 2007 to Feb 2008.
Team Size : 250
Client : Rabobank (Holland)
App Server : IBM Web sphere (6.0)
Development : **J2EE, JSP, Struts, Spring, Hibernate**
Database : oracle 10g.
Role : Developer

Summary : The CPL project is a banking domain project. It aims at providing products in the form of loans, insurance, mortgage, etc to the customer. The project realizes a MDA (Model Driven Approach) for development. The models are designed by B.A.I (Business Architect International). Rabobank is one of the largest financial service providers in the Dutch market. In accordance to work towards the Group's target to generate customer value, it has decided to develop a new centralized system for the mortgage loans service. Business Architects International (BAI), a third party organization, is contracted to design the new IT solution. BAI has captured the requirements in Use Cases and has developed the design model. Capgemini India is contracted for development, Testing and implementation of the solution

Responsibilities :

- Actively participated in developing the projects.
- Understand business requirement, study test cases.
- Responsible for coding Struts Framework.
- Developed backhand using hibernate.
- Developed user interfaces using JSP.
- Defect fixing during UAT support.
- JUnit testing.

NIIT LTD. (SOFTWARE ENGINEER) (NOV 2006 TO FEB 2007)

Project#9

Title : Philip's Learning Management System
Duration : Nov 2006 to Feb 2007
Client : **Philips**
App Server : WebLogic 8.1
Development : **Java, JSP, Struts, EJB 2.1, Eclipse, JDBC, PL&SQL.**
Database : oracle 9i.
Role : Developer

Summary : A specialized learning and development offering designed for Philips employees around the globe to enable consistent development of the employees. Employee can browse through the comprehensive offering and register for the courses that align with their development need as agreed to with their manager. PLMS is a role based as each user in this system has specific privileges to access it. Once a user logged in the course dashboard displays the current registered course's he/she is registered. Learner has to first login into this system if learner is not registered then learner must have to register first. On successfully login learner can see the course in which he is registered. Learner can click on the link of the course name the detail of the course like planned start date, location etc. will be seen. Learner can see also his performance of the course like complete, incomplete, score etc. if learner can change there profile using Change User Profile quick link menu. While manager Roles logged in they can see the Report menu and can see various reports available in the system.

Responsibilities :

- Actively participated in developing the projects.
- Understanding of functional Specification documents.
- Responsible for coding Struts Framework.
- Developed Business Components using Session Beans.
- Developed user interfaces using JSP.
- Defect fixing during UAT support.
- Creating Unit Test Plan for the new requirements.

WEBVIRTUE SOFTWARE SOLUTIONS (SOFTWARE ENGINEER) (JUL 2005 TO OCT 2006)

.

Project#10

Title : Time Management System
Client : Gixpro Inc USA
App Server : Tomcat 5.0
Development : **Core Java, JSP, Servlets, Jdbc, HTML, JavaScript**
Database : Oracle 9i
Role : Developer

Summary : Gixpro is a US based software development company having its head office in Ohio. It is developing software both offshore and on the client's site. Its employees are working on various projects in different parts of U.S. The TMS aims at allocating projects to various employees, keeping track of scheduled end dates, clients' payments, and employees' salary as well as computing the vendors' commissions. Employees are paid on an hourly basis and different policies are there to compute their payment while they are on bench. When on project, employees are required to fill in an online time sheet on a fortnightly basis and submit it to the company. The project aims at tracking time spent by different employees on various projects. It also generates various triggers like an email to an employee who does not fill in the time sheet by specified date, reminder to a client who does not make the payment and so on.

Responsibilities :

- Actively participated in developing the projects.
- Understanding of functional Specification documents.
- Designed the module in such a way that new changes can be easily layered on it.
- Developed user interfaces using JSP.
- Defect fixing during UAT support.
- Creating Unit Test Plan for the new requirements.
