Background Summary

- A **Senior Solution Architect** with **17 years of Information Technology** experience in **Automotive/Telematics/CRM** industry with expertise in **Defining Strategy, Architecture, Integration, Design and Development of enterprise solutions** in a technical diverse environment.
- **Strong Leader with Business Acumen** and **key decision making skills**, have worked closely with key players of the enterprise including Business stakeholders, Portfolio/Program Management, Application Delivery, System Operations, Application Sustain and the extended enterprise organization on a day to day basis.
- Have demonstrated track record of leading complex engagements and driving them to successful implementation. Have managed and mentored Off-shore and On-shore technical teams throughout SDLC of multiple projects.
- Have demonstrated the ability to transition quickly in to new business domain.

Objective

- I am looking for a **Senior Solution Architect** position in Information Technology to make a significant contribution towards business success

Core Competencies

- **TOGAF 9 Enterprise Architect** with expertise in designing Business, Application, Data, Technical Architecture, Enterprise Application Integration.
- Business Process Modeling (**BPM**), **SOA** Design and Integration patterns, SOA Governance, **Web API, J2EE**
- **Automotive/Telematics** industry experience and incorporated **e-TOM** Business Process Standardization, **BSS/OSS Systems.**
- **CRM** Experience with expertise in designing business process workflow using **PEGA CHORDIANT**.
- Data Architecture experience includes **Data modeling**, **TMF SID** (Standard Information Data), **Data Migration strategy** and execution.

Education

- B. S. Computer Science and Engineering, **Regional Engineering College, (REC/NIT)** , India - **1996**

Technical Summary

Technologies	SOA, Oracle OSB, JAX-WS, JAX-RPC, SOAP, WSDL, Java, J2EE, EJB, JAX-WS, JAXB, JAX-RPC, Hibernate, XPath, XQuery, XSD, WS-*,XML, HTML, OOA & OOD, TDD, UML, JSON, REST, SSL, SAML, OAuth, C, C++, Spring, Hibernate
Middleware	Weblogic, Oracle OSB, Oracle SOA, CHORDIANT, APIGEE, Tomcat, Apache, JBOSS, Mule
Databases	Oracle 10/11g, Oracle RAC, Oracle Clusterware, PL/SQL, SyBase, UDB-DB2
Tools	Enterprise Architect, Together Architect, Eclipse, JDeveloper, RAD, SOAP UI,

gvspandi@gmail.com

(c) 248-854-8479

	XML SPY, Visio Architect, Ant, SVN, Fitnesse, Load Runner
Patterns	SOA Integration patterns, GoF Patterns, Core J2EE Patterns
Domain	Telematics, BSS/OSS(CRM), Order Management, Payment Processing, Marketing/Campaign/Program Management, Product/Offer Catalog, Service Configuration/Activation, Service Fulfillment

Employment History

- September 2005 – current - HP (EDS)
- May 2000 – September 2005 - Systems Technology Group
- January 1997 – May 2000 - Pentafour Software & Solutions

Residential Status - Permanent Resident

Engagement Overview

GM OnStar/Global Connected Consumer (Remote Link Lite -Mobile Services/ Gen 10 4G LTE) November 2012 –Current

Goal of these initiatives was to incorporate new generation of telematics hardware, wireless carrier, infotainment systems and their associated set of new product and services for 2015 model year vehicles and for model year 2014 vehicles to support subset of new product and services with existing hardware and wireless carrier

As a **Senior Architect**, responsibilities include

- Planning and defining/designing enterprise business process related to Product/service life cycle management, Enrollment, Service Activation, Sell Products, Order Management, Deactivation to accommodate product and services for 4G LTE hardware/wireless carrier.
- Identification/analysis of fragmented service/service level entitlement rules across the enterprise and design strategy/solution for an enterprise service entitlement service to be used by enterprise application and partner applications (mobile).
- Designed SOA Service Interfaces/Contracts for enterprise business services and APIGEE APIs for the RESTful services to be used by partner mobile applications.
- Tailored TMF/SID (Standard Information Data) to support new data architecture for products/services to be offered by the hardware/wireless carrier.
- Worked closely with Business stakeholders, Portfolio/Program Management, Operations Management for scope definition, Solutions, Agile Estimations, Iteration cycle, Risk Identification and Operation processes

GM OnStar (Enterprise Call Center Automation//Global Advisor application) November 2009 – November 2012

Goal of this initiative was to redesign the OnStar enterprise architecture/applications to support global market (North America, China, Mexico) and to achieve master global codebase to support future market extensions.

As a **Senior Architec**t, responsibilities include

Pandiyan Varadaraj
gvspandi@gmail.com
(c) 248-854-8479

- Designing SOA based orchestrated business processes and SOA Enterprise services for automated batch/online processes reference architecture related to Enrollment, Marketing/Campaign/Program Management, Product/Offer Catalog, Order Handling, Product/Service Fulfillment, Service Configuration/Activation, Billing, Customer Interaction Management for global market
- Incorporating Industry standards oagis, star schema for canonical schema definition of schemas (MDM) across the enterprise when designing interfaces.
- Redesigning existing enterprise data architecture for global markets including designing strategies & Data migration planning.
- Tailoring TMF (Telematics Forum) SID (Standard Information Databases) to support core enterprise data model/business entities and TMF e-TOM for business process for OnStar.
- Tailoring Pega Choridant Workflow for CRM business processes which includes Manual Enrollment/Service Activation, Product Catalog/Sell Products, Return to Stock, Deactivation for the OnStar enterprise to support global market.
- Designing Oracle Coherence cache to support Call Center Advisor Application for In-memory caching of session data across different use cases within a particular inbound call.
- Working closely with Senior Management including Stakeholders, Portfolio/Program Management, System Operations related to Scope Management, Agile Estimation Planning (Resource/Time/Cost), Project/Iteration Planning, Release/Capacity Planning
- Played key role in Integration across enterprise applications, mentoring Development, Sustain, Quality Assurance, Operation Management, Service Restoration & Monitoring teams, Global Command Centers during different phases of SDLC
- The implementation of this initiative was achieved through Oracle SOA/OSB for Enterprise business services and processes. CRM platform was implemented using Pega Chordiant Workflow, Chordiant Decision Manager/CDM, Oracle Coherence Cache, and Hibernate. JSF, Weblogic Application Server, Oracle Database.

GM OnStar (Call Center Automation (CCA)/Renewals and Sales Automation/e-Subscriber) September 2005 – October 2009

Goal of this initiative was to generate additional revenue from different marketing channels by eliminating duplicate data snapshot infrastructure across different data centers and achieving real time access to CRM related data.

As a **Solution/Integration Architect**, responsibilities include

- Identification/design/automation/integration of discrete enterprise business functions/process within the CRM organization to be used by non-Advisor marketing channels to enable boundary less information flow.
- Redesigning existing enterprise application architecture into discrete real time/synchronous business services (Web services), batch/asynchronous enterprise business process to be used by the enterprise, and by the extended enterprise.
- Designing Service/batch interfaces, service contracts, Data sharing agreements for the enterprise and integrating enterprise applications (including extended enterprise applications) in a diverse technical architecture environment.

- Integrated with COTS products and services like Trillium Address Verification/cleansing (batch/online), StrikeIron Email Validation, Stocks Quotes (Fidelity), Weather, Traffic, VEDS/Vehicle Emergency Data service for Emergency-911/PSAP support.
- Working closely with Senior Management including Stakeholders, Portfolio/Program Management, System Operations related to Scope Management, Agile Estimation Planning (Resource/Time/Cost), Project/Iteration Planning, Release/Capacity Planning
- Played key role in Development/Integration/Governance, Collaboration with COTS vendors and partners, Mentoring Sustain, Quality Assurance, Operation Management, Service Restoration team, Global Command Centers during different phases of SDLC.
- The web services were secured SOAP based, Document Literal services (not SOA) to support high interoperability and were hosted in Web logic application server.

DaimlerChrysler Corporation (Global Account Payables (Foreign Funds))
March 2004 – September 2005

As an Application Architect, responsibilities include

- Analyzing, designing the framework components for the Batch and the On-line application (Servlets, Message Driven beans and JSP).
- Designed framework components (synchronous and Asynchronous communication) for EAI (Enterprise Application Integration) with SAP(BAPI), IMS, MQ-Series (Using Connectors and Message Driven Bean)
- Developed use cases, use case relationship diagrams, sequence diagrams, and class diagrams and validating these diagrams developed by the developers. Enforced the usage of Design patterns (GoF and J2EE), STRUTS framework, Tab libraries for the implementation classes.
- Designed specification and enforced Quality by means of Code Review, Load testing (scalability) and memory leak tests and Documentation (Load Runner and JPROBE memory debugger).
- Lead and mentored team of developers (both on-site and off-shore).
- Environment - J2EE (JSP, Servlets, EJB, Tag libraries, Connectors), WSAD 5.0 (WebSphere Studio Application Developer), STRUTS, Log4j, IMS, SAP, Load Runner, JPROBE Memory debugger.

Previous Engagements

DaimlerChrysler Corporation: UPIC (Uniform Process for Incentives @ Chrysler)	July 2002 – March 2004
Chrysler Corporation: Balanced Score Card	July 1999 – July 2002
Chrysler Corporation: Chrysler Reporting Server	September 1998 – June 1999
Group of Technical Institutions Head Quarters at Singapore : Enrollment Help Desk	December 1997 – September 1998
LMW: Online Customer Support System	March 1997 – December 1997
