Summary

- 8.6 Years of experience in Functional & Technical Design, Enterprise Technology Architecture, Implementation and Solution Delivery
- Business rules implementation and integration (IBM ODM – ILOG JRules and Corticon)
- Experience in Solution Architecture, SOA, BRMS, RIA, Distributed Systems Development and Middleware solutions.
- Worked on CMMI implementation, Release and Configuration Management
- Sun Certified Web Component Developer (SCWCD) with 94 % (April 2008)
- Sun Certified Java Programmer (SCJP 1.5) with 84 % (July 2007).
- Software Engineering (SE) Process Certified
- Tools/Technologies/Frameworks:-JSF, Spring, Hibernate, Struts (1x, 2x), EJB, XML, UML, JSP, Servlets, Web-Services (SOAP, REST), Netrics-Search Engine, ESB (IBM, JBoss), and Reporting Tools (Jasper, Crystal Report), Adobe Flex, WebCenter(ADF)

EXPERIENCE SUMMARY:

- Working as a Specialist Senior in **Deloitte Consulting** from 28th July 2008 to till date.
- Worked as a Consultant in **Capgemini Consulting India Pvt. Ltd., Mumbai** from 17th July 2006 to 25th July 2008.
- Worked as a Software Engineer in **Webdunia.com** Pvt. Ltd (www.webdunia.net), Indore (M.P.) from 1st June 2005 to 14th July 2006.

TECHNICAL PROFILE:

Languages/ Framework	Java & J2EE, JSF(ICEFaces), JSP, Servlet, JSTL, JQuery, Struts and EJB, Spring, Hibernate, Web Service (REST and SOAP), Adobe Flex, Blaze DS, Dozer, Oracle ADF, Oracle WebCenter
Tools/Techniques	Development: Eclipse, RAD, JDeveloper, IntelliJ IDEA Build/Continues Integration: Ant, Maven, Hudson

	Design: RSA, Enterprise Architect, Toad Data Modeler Version Management: SNV, CVS, VSS, ClearCase Other: Junit, Silk Test, soapUI, TIBCO Patterns Search Engine (Netrics), IBM WESB
Rule Engine	IBM ODM (ILOG JRules), Corticon
Reporting Tools	Jasper, Crystal Report
Applications/ Web Servers	Weblogic 9.2 & 8.1, IBM WebSphere -7and 8, JBoss, Apache Tomcat, Jetty
RDBMS	DB2, Oracle, MySQL, MS-Access, SQL Server

PROJECT EXPERIENCE

Deloitte Consulting Experience – 68 Months

1. Industry: Public Sector/Health Insurance
Role/Duration: Senior Developer, Solution Architect/ 3 months.

Working on the assessment and creating a solution for one of the US State major HIX implementation.

Key Responsibilities:
- Worked on conducting technical session with client and vender
- Verification of existing issues and prepare upcoming technical recommendations
- Estimation, Technical Design and Implementation

Technology/Frameworks:
IBM Websphere 7, ILOG JRules (ODM), Spring, Hibernate, DB2, SVN, Maven, Java, Struts, WESB, Data Power, Crystal Report, Adobe Life Cycle, WebCenter (ADF)

2. Industry: Public Sector/Insurance
Role/Duration: Senior Developer, Solution Architect / 12 months.

In order to transform and modernize the state services delivered to customers in a holistic and collaborative manner, one of the US State has determined it necessary to build and deploy a Common Access Front End system for ES, CS and CW programs. This comprises of the end user facing customer portal, provider portal and internal worker portals.

Key Responsibilities:
- Worked closely with Functional team for Functional Design review and Technical Design. Participated in the JAD sessions with the Client.
- Worked on overall Project Planning, Tracking and Effort Estimation
- Led the team for worker portal development – ES, CS, CW and Providers modules.
- Worked on Framework optimization, design and architecture of overall application.
- Ramped up the team on Functional and technical aspects for the project

Technology/Frameworks:

IBM Websphere 7, ILog Jrules (ODM), Corticon, Adobe Flex, Spring, Hibernate, DB2, ClearCase, Maven, Data Migrator Tools and HATS (For client legacy system integration).

3. Industry: Financial Services (Mortgage Fee Processing)

Role/Duration: Senior Developer, Solution Architect / 16 months

In light of the FTC settlement and increased scrutiny by federal regulators like OCC, banks are under increased pressure to ensure that fees charged to borrowers are in compliance with state and federal laws, investor guidelines, local bankruptcy court rulings, fair market value of services and individual bank polices. Banks now need to find a balance between how much to charge to borrowers, how much to recover from investors and how much to write-off as losses. Banks now also face additional scrutiny from investors who are concerned that servicers will now act with extra caution and leave money on the table. Finally, ensuring compliance will require investments in technology infrastructure to achieve regulatory compliance

Key Responsibilities:

- Lead the team on Java and Rule Engine (ILog-JRules) work.
- Work on design and architecture of overall application.
- Analysis and gathering of business requirements.
- Business rules design and development (Using - ILOG).
- Integration of Business Rules with Java and client application.
- Design and implement Interfaces to verify the architecture and systems' integration

Technology/Frameworks:

IBM Websphere application server 7, BREDGES, IBM ILOG Jrules BRMS 7, Jasper Report, Oracle 10g, Hudson, Blade Logic, Quality Center, SVN, EJB, IBM MQ.

4. Industry: Public Sector (Child Welfare)

Role/Duration: Senior Developer, Solution Architect / 18 months

HHS NextGen is Health and Human Services (HHS) Solution Suite which is being built in incremental manner. This solution is being used to demonstrate Deloitte's Child Welfare capabilities and will also provide comprehensive foundation to jumpstart new Child Welfare engagements.

This solution was focused towards building cutting edge solutions using Rule Engine (ILOG - BRMS), Adobe Flex, Adobe LiveCycle Enterprise Suite, Enterprise Service Bus (IBM ESB) and Process Servers.

Key Responsibilities:

- Led the team on Research oriented works (Rules Engine– ILOG/Corticon, Flex, Hibernate, Spring, BRIDGES, Search Engine-Netrics, Crystal Reports, etc.)
- Business rules design and development (Using - ILOG, CORTICON).
- Integration of Business Rules with ESB and Web Application.
- Work on application architecture for Flex, J2EE layer(Business Layer) and Integration Layer (Rule Engine-ILOG/ Search Engine–Netrics, ESB)
- Research and implementation of Rules Engines, Flex and Search Engines work.
- Design and implement Interfaces to verify the architecture and systems' integration

Technology/Frameworks:

IBM Websphere application server 6/7, IBM Websphere Process Server 7, IBM

Websphere Enterprise Service Bus 7, Adobe Flex, IBM ILOG BRMS, Netrics Search

Engine, LCDS, BlazeDS, Hibernate, Spring, Crystal Reports.

5. Industry: Public Sector

Role/Duration: Developer / 20 months

In the United States of America, there is a federal mandate for all the states to have a software system in place conforming to the SACWIS standard – to manage and track child welfare activities including adoption, placement, court processing and other required features. This project is all about implementing SACWIS solution for one of the US State. The project follows the CMMi Level 5 methodology for the software engineering processes.

Key Responsibilities:

- Use Case analysis and Requirements understanding.
- Design analysis, implementation and unit testing.
- Release/Build Management
- Report integration and Management

Technology/Frameworks:

Java-J2EE, JBOSS-4.2, Oracle 10g, Struts, EJB (Session, Entity Bean), Optimal J, CVS.

Previous Experience – 42 Months (CapGemini and WebDunia)

1. Industry: Technology, Media & Telecommunications

Role/Duration: Developer, Release-Configuration Management / 24 months

This is web portal development for the leading Telecom/Network/kable Tv distribution platform in Denmark. This also contains a admin section to help Customer care representatives to provide various facilities and details to cable TV customers.

Whole portal development is divided in to two parts UI and Web Service layer which uses the EJB. The UI development is on BEA Weblogic Portal 9.2. There's also an integration of Savvion Process Flow & YASU rule engine with Kiss Portal.

Key Responsibilities:

- Worked on the architecture and design of UI application.
- Design Review, implementation and unit testing.
- Configuration Management.
- Have worked on client site (Denmark) to participate in requirement analysis, design and implementation activities.

Technology/Frameworks:

WebLogic 9.2, Oracle, Technologies/Tools: Ice Faces(JSF), Spring, EJB (Session, Entity Bean), Web services, IntelliJ IDEA, Eclipse, XML, SVN, Maven, SoapUI, UML, JavaScript

2. Industry: Technology, Media & Telecommunications

Role/Duration: Developer, Release-Configuration Management / 18 months

This project is for a leading telecom and networking company which offers an application service that allows cable MSOs (Multiple system operators) to sell digital cable, high-speed data, and VOIP products online, via their existing Web sites. Client Solutions services over 15 million homes passed in more than 20 cable markets throughout the US.

This web portal is accessed from 32 different divisions; each has some distinguish features and different database. This application utilizes most of J2EE concepts.

Key Responsibilities:

- Worked on resolving various defects/change requests.
- Worked on Dynamic Field Generation and Generation of XML From DTD.
- Developed various taglib to automate the things on jsp's .
- Worked on almost every part of application starting from analysis, designing to testing and final release. Enter Key Responsibilities in Bullet form

Technology/Frameworks:

Web Server:	New Atlanta ServletExec AS 5.0,
Database:	SQL Server 2000.
Technologies/Tools:	Struts, JAVA (Core, JSP, Servlet, JSTL), XML, DTD, JUnit, Zeus-API Xml Parsing), CVS, ANT, Perl, JavaScript.

OTHER DETIALS

Education:

Master Of Computer Application (MCA) – Honors (82%)
RGPV University Bhopal, India.

Bachelor of Computer Science (Honors) – 70%
DAVV Indore, India.
