Summary:

- **About 7 years** of IT experience in Software development in various domains with **Pega PRPC, Java,** and **J2EE** technologies.
- **4** years of experience in Designing and Implementation of complex PEGA Rules Process Commander (PRPC) projects.
- Hands on Experience with **CPM** and **Smart Investigate** frameworks.
- Experience in **Agile/Scrum methodology** and Agile tools such as **JIRA**.
- Involved in detailed reviews of **BRD** and **SSD** documents and created status reports and Technical Specification documents for various projects.
- Certified **PRPC Senior System Architect.**
- Involved in Designing High Level **Class structure, Workflows** and **Rule sets** in **Pega PRPC**
- Experience in implementation of various PRPC components like **Decision Tables, Decision Maps, Declarative Expressions, and Indexes** etc.
- Expertise in **PRPC flows,** interpretation of complex **Flow shapes** for business scenarios, **Activities, Activity step methods**
- Prepared **Access Roles and Access Groups** for PRPC work flow team
- Created **HTTP** and **SOAP** service and connector rules, Connect sql rules for RDB operations.
- Used File Listeners, JMS Listeners and XML stream and parsing rules.
- Created reports using **List View** and **Summary View** rules
- Expertise in developing **User Interfaces, Screen Layouts** using **JSP's** and **HTML**
- Good knowledge on PRPC construction and debugging tools such as tracer utility, clipboard, Application accelerators and Expression builders.
- Experience in **CTI** and **IVR** integration using AVAYA.
- Experience in using Cross-Domain AJAX for secured billing integration.
- Proficient in using Relational Databases like Oracle, DB2, SQL Server and My SQL

- Have exposure in different stages of Software Development Life Cycle (SDLC)

- Solid communicator with exceptional team-building skills, dedicated, self-motivated achiever and ability to work independently and perform well within cross-functional teams

TECHNICAL SKILLS:

Languages & Tools: Java, J2EE, EJB 3.0, Servlets, JDBC, C, C++, PL/SQL.
Web/Application Servers: Web Sphere**,** Tomcat
Operating Systems: Windows XP/7/8, MS-DOS, UNIX
Web Technologies: HTML, XML, DHTML, SOAP, MS XML3.0, JSP, SOAP
Databases: Oracle 11g, DB2, SQL Server.
Design Tools: Microsoft Visio, UML, MVC.
BPM Tools: PRPC V6.1, 5.5, 5.4, 5.3, 5.1
Verticals: Banking and Insurance

EDUCATION & CERTIFICATIONS:

B.E, Electronics and Communication Engineering **2003-2007**
JNTU University, India

Certified Pega Senior System Architect (CSSA)

Certified Pega System Architect (CSA)

PROFESSIONAL EXPERIENCE:

NEWCorp, VA **Feb'11– Till Date**
Senior Pega System Architect

Responsibilities:

- Followed Agile/Scrum Methodology and used CPM framework to build applications for Customer service representatives.
- Involved in the design and development of class structure for the call flow which involved from the scratch implementation of generic claim process common to multiple clients.
- Detailed Understanding of interaction driver and intent tasks to create service items for an interaction.
- Design and development of Harness rules, Layout and sections.

- Customized CPM composite using advanced UI rules.

- Created Connect Sql rules and used RBD methods to connect with external databases.

- Modified out of box reporting and created new reports using List view and Summary view rules
- Created HTTP and SOAP service and connector rules.
- Developed Rules for validation and integration pertained to Rule-Connect- and Rule-Service.
- Created Correspondence rules and SLA.
- Created products and patches for deploying code.
- Created and maintained Agent rules and sent work objects to agent queue for processing.
- Implemented IVR and CTI integration with CPM call flow.
- Involved in writing the Rule-Utility-Functions to connect to SMART API's and developed broker activities to connect to the external Services.
- Used Cross-Domain AJAX for implementing secured billing adhering to the ACH compliance.
- Created Operators, Workgroups, Workbaskets, Data tables, Database Name Objects and Database Table Objects
- Implementation of Decision tables, Decision Maps and Declarative expressions and other declarative rules.
- Used Tracer, Clipboard, Performance Tool, System Management application, and the log files for debugging.

Environment: PEGA PRPC V6.1, CPM V6.2, Oracle 11g,Windows 7, JAVA,JSP, MS Visio, SQL, HTML, CSS, XML

Kaiser Permanente **May'10 - Jan'11**

Pega System Architect.

Responsibilities:

- Understanding the technical requirements from business requirements thoroughly in Health Care domain and Claims Management.
- Integrating basic PRPC application with Customer Process Manager (CPM) for Health Care framework.
- Involved in importing Pega Rule Process Commander Application and monitoring the application deployment.
- Involved in **Design and development of Data Model, Class structure, Access Group, Process flow, Activities and UI properties.**
- Development of the **application based on the Design**.
- Implementation of **Decision tables, Decision Maps and Declarative expressions**.

- Created **Activities** that automates several tasks.
- Created **work flows** to support various **assignments**, and **correspondence** generation.
- Creation of search **reports** using **List view** and **Summary view** rules of PRPC.
- Used the **TRACER** to examine the rules and to minimize the execution time.
- Performance test of all activities and rules using **PRPC-PAL Tool**.
- Developed **Rules for validation and integration pertained to Rule-Connect- and Rule-Service.**
- Involved in the **SOAP service** for the Service Request and **WSDL** deployment.
- Involved in Creation of **validation rules** to implement business logic validation.
- Extensively involved in updating and deploying different **Rule Set Versions** as required by the organization.
- Involved in **Design**, **Development** and **Deployment** of application.
- Communicating with teams, Client including guiding other technical members.

Environment: Pega PRPC 5.4, CPM HC , Web logic, Windows , Unix, MS Visio, Adobe Photoshop, XML, HTML and Oracle 10g**.**

US Bank Corp, MN **Oct 09-May 10**
Pega System Architect

Responsibilities:

- Implemented core business and logic using Smart Investigate framework for claim processing and customized it to meet business requirement.
- Created, customized Flows and Action forms as per the Requirements.
- Creation of Activities and steps for implementing Core Business Logic.
- Implementing Decision Rules.
- Created Declarative expressions, Trees and Tables and Declare Triggers
- Created SWIFT correspondence using SmartInvestigate framework.
- Used Declare Indexes for reporting purpose.
- Worked extensively on reporting which included list views and summary views.
- Customization of user and manager portals.
- Created and Implemented Service and Connect rules.
- Checking code for compliance of standards and PEGA Guardrails.
- Testing and Debugging using Tracer and Rules inspector.
- Created File Listener for automatic creation of work object.
- Used SOA architecture for Integration.

Environment: PRPC 5.5 SP3, Windows XP, DB2, SmartInvestigate, Websphere 6.1, XML, HTML, MS Visio.

Mind Tree, India **June 07 –Aug 09**

J2EE Developer

Worked in design, development and test support of workflow applications in multi-product order management back office and billing applications for a huge recreation product manaufacturer.

Responsibilities:

- Involved in the requirement analysis for the development of the system.
- Involved in real-time system study of the client requirements and implementation the project on the client side.
- Effectively interacted with the parent team whenever the changes or modifications required.
- Involved in the heart of the application ADMINSTRATION module to create roles and assigns the permissions and maintaining the system through logs.
- Developed Session Beans and Entity Beans as modeling components for storing and retrieving data for administration module.
- Implemented Message Driven Bean for multiple asynchronous connections being made and calling Java Mail API to send the mails through the JMS (QUEUES).
- Involved in System Testing for APPSS.
- Supported the applications through debugging, fixing and maintenance releases.
- Created EJB's and deployed them on the Web Logic Application Server on Windows NT.
- Configuration of Web Logic Application Server and Deployment of APPSS.
- Wrote stored procedures and queries to access/update data from Oracle.
- Provided exception handling and logging using LOG4J Logger.
- Also involved in Unit testing with testing team.
- Installed, implemented and maintained Sun J2EE Server domains for development environment responsibilities included deployment of EAR, WAR, and EJB Jar settings.

Environment: Java, EJB, JSP, Servlets, JDBC, JavaScript, Web Logic Application Server, XML, Windows-NT, and Linux.
