SUMMARY OF QUALIFICATIONS

More than thirteen years of professional experience as a **Project Manager and Senior Business Systems Analyst** leading **cross-functional teams** in **deadline-driven, project-oriented environments**. Strong **analytical skills** applied in business and **requirements analysis** for a variety of industries including healthcare, entertainment, education, search engine, mortgage, insurance, financial, nuclear, accounting and banking. Broad understanding of development and relevant **object oriented re-engineering** techniques indicative of a **versatile business analyst**. Knowledgeable in data modeling, data warehousing, and web services providing a clear perspective of **data manipulation**, presentation, transfers between multiple platforms and delivery through appropriate **interfaces**. Excellent **oral and written communication skills** with the ability to communicate appropriately in **all levels of business** and **technical** situations. **Managed projects** to determine the **scope**, **timeline**, and **budget** through execution. Proficient **problem solving skills** allowing rapid assimilation and resolution of complex issues.

AREAS OF EXPERTISE

- **Managing multiple high-profile projects** in fast paced and high demand environments
- Collaborating with **executives** to determine the **scope**, **timeline**, and **budget** of the projects
- Proficient in leading System Development Life Cycle **(SDLC)** methodologies including **Agile/Scrum,** Rational Unified Process **(RUP),** and the Waterfall model
- Conducting Joint Application Development **(JAD)** sessions, interviews, group meetings, brainstorming sessions, and walkthrough requirements gathering sessions
- **Business modeling and analysis** using **UML** diagrams such as **Use Case** diagrams and **Activity** diagrams using **Enterprise Architect, Rational Rose, Microsoft Visio,** and **Caliber Define IT**
- **Gathering**, **analyzing**, and **documenting** business requirements and writing use cases, based on information gathering sessions with **users** and **technical** team members
- **Requirements management** skills using software tools including **Enterprise Architect**, **Rational RequisitePro**, **Mercury Test Director, Caliber RM, and Jira**
- Documenting artifacts such as User Requirements Specification **(URS)**, Functional Requirements Specification **(FRS)**, Software Requirements Specification **(SRS)**, and **Traceability Matrices**
- **Analysis, design,** and **implementation** of processes and tools targeted towards measurement of **software release metrics**: **requirements coverage**, **test execution**, and **defect tracking**
- Designing and conducting User Acceptance Testing **(UAT)** based upon user requirements
- Knowledgeable in **Oracle** and writing **SQL queries** and understanding **entity-relationship diagrams**
- **Gap Analysis**: integrating legacy systems with new application functionality and data conversion

TECHNICAL SKILLS

Modeling Tools:	Enterprise Architect, MS Visio, Rational Rose, Define IT
Requirements Tools:	Visual Studio, RequisitePro, Mercury TestDirector, Caliber RM
Testing Tools:	Quality Center, WinRunner, LoadRunner, Rational Robot
Databases:	Oracle, Sybase, Rapid SQL, SQL Server, MySQL, MS Access
Programming Languages:	C, C++, Java, JSP, Visual Basic, SQL, HTML, .Net, XAML
Operating Systems:	Windows, Unix, Linux, Mac
Networking:	TCP/IP, Network Protocols, Web Services
Other Tools:	SAP ERP R/3, Omniture, Jira, TFS, MS Designer/Blend, Doc/Content Mgmt, Photoshop, Lotus Notes, Documentum, ExactTarget, Sitecore, PEGA PRPC, OBPM, Salesforce, Workday Cloud SaaS, Mobile

EDUCATION

Bachelor of Science - Computer Information Systems, California State University Los Angeles

PROFESSIONAL EXPERIENCE

USC, University of Southern California – Los Angeles, CA (Contract) July 2013 – Present
Project Manager / Senior Pega Business Systems Analyst

USC is a leading private research university. Project effort was to integrate legacy systems to the cloud software-as-a-service (SaaS) application platform.

Responsibilities:

- Successfully managed the completion of the integration of multiple legacy systems to the cloud SaaS infrastructure platform universally consumed by all users
- Led the migration to conversion process including development and deployment efforts, testing and UAT processes while maximizing resource efficiencies
- Substantially increased proficiency in human resources, payroll and benefits, and timekeeping
- Ensure integrity and delivery of multiple projects with respect to time, budget, scope creep, rapid changes, risk management and overall resources
- Created the Request for Proposals (RFP) and Fit-Gap analysis artifacts for the transition of additional downstream applications to the recent cloud technology platform
- Convinced executives to buy-in to the RFP created by demonstrating the efficiencies and benefits
- Mitigated company risk associated with compliance and protected user privacy by ensuring encryption solutions are maximized
- Provided resolutions to company staffing reductions, technical strategies, and mitigated long-term risk by identifying, escalating and resolving issues across multiple delivery groups and projects
- Conducted planning and operational readiness assessments to provide an effective transition into production along with custom training procedures and resources

Environments: Workday HCM and Financial SaaS Cloud, Jira, Kronos, Kuali Financial Systems

---

United Health Group - Cypress, CA (Contract) April 2012 – July 2013
Project Manager / Senior Pega Systems Analyst

United Health Group is a leading health care company, serving more than 75 million people worldwide. Projects were based on improving applications Oracle BPM and Pega PRPC.

Responsibilities:
