Abirami Srinivasan

iyerabi@gmail.com|864-474-6552

PROFESSIONAL SUMMARY

- **Over 9 years of IT experience in Design, Development, Testing, Maintenance and Support.**
- Skillful experience in modeling and development of Business Process Integration designing using several TIBCO Suite of products like **TIBCO Runtime agent 5.x, TIBCO Active Matrix Business works 5.X, TIBCO Domain Utility, TIBCO iProcess Modeler, TIBCO BPM, TIBCO Administrator, TIBCO EMS 6.x, TIBCO Hawk, TIBCO Service Grid**
- Dexterous knowledge on **SDLC** (Software development life cycle) of Integration (EAI/SOA) projects.
- Expertise in systems and process monitoring using **TIBCO Administrator**, with hands on **Performance Analysis and Maintenance of System stability**.
- Proficient experience in using messaging standards such as **TIBCO EMS and MQ/JMS** for distributed computing applications.
- Proficient experience of handling different transport protocols between applications like **TIBCO EMS 6.X, MQ/JMS and HTTPS**.
- Proficient in using Database resources using **JDBC** and **ODBC** Connections considering optimum performance. Expertise in Web services using **SOAP/JMS, SOAP/HTTPS and SOAP/HTTP**.
- Proficient developing **Java Custom Functions** for **TIBCO Business works**.
- Experience in designing and developing **XML Schemas, XSLT, XPath, WSDL, SOAP and HTML**.
- Experience in working with **RDBMS** technologies such as **ORACLE 8i/9i/10g (SQL and PL/SQL), SQL Server 7.0/2000/2005, Writing SQL queries, stored procedures, functions and triggers**.
- Proficient in developing, importing and exporting **Custom Design Time Libraries**.
- Sincere, enthusiastic, hardworking with good communication and interpersonal skills and appetite to learn new skills.
- **Team oriented** working style, setting goals and priorities which are specific, measurable, achievable, realistic and time-framed.
- Provide service delivery included in the areas of **Incident**, **Problem** and **Change** management.
- Knowledge in Project Execution & Management, **Customer Issue Resolution** and Process Improvements.
- Expertise in all aspects of IT strategies with proven strengths in designing and development coherent and comprehensive suite of **Banking, Securities and Transport domains**.
- Excellent written & oral **communication** skills; capable of innovative solutions to engineering issues.

TECHNICAL SKILLS

TIBCO Messaging	:	EMS and Rendezvous (RV)
TIBCO Integration	:	Active Matrix Business Works
TIBCO Adapters	:	ADB Adapter, MQ Adapter
TIBCO Monitoring	:	Hawk
EAI	:	Business Works 5.x, TIB/Designer 5.x, ADB 5.x, EMS 4.4.1, Administrator 5.x and Hawk 4.7, TIBCO iProcess
Languages	:	Java, C++, C, ASP .NET, C#, VB .NET, HTML, XML, XPATH, XSLT, XSD, SOAP, XSLT, WSDL, Unix shell scripting, PL SQL.
Operating Systems	:	Windows 7, Vista/2003/XP/98, UNIX (Solaris, Linux), HP-UNIX, Red hat Linux, MS-DOS
Databases/Tools	:	Oracle SQL Developer, Microsoft SQL Server, MySql
Protocols	:	SOAP
Tools	:	Rational Clear Case, SOAP UI, XML Canon, IBM RTC, Tectia SSH Client, Eclipse IDE, CVS Tortoise
Verticals	:	Banking, Securities, Transport

EDUCATION:

- **Bachelor of Science in Information Technology**, Anna University, India.

CITI Bank- Irving, TX **Jan 2011 – Till Date**

Role: TIBCO Developer-Administrator

Project: Credit Initiation

Client Description: Citibank is a wholly-owned subsidiary of Citigroup, one of the world's largest financial services organizations. By combining local expertise with the strength of Citibank's worldwide consumer banking network, it offers some of the world's leading range of financial services including deposit accounts, foreign currency deposits and investments as well as credit cards, mortgages, insurance and charge cards. CITI has been developing a unique front end application (Eclipse), this global platform would serve as a single application where the user can profile and go through a customer life time interaction with CITI and serve the customer with best possible solutions.

Project Description: Credit Initiation deals with Cards and Loans and captures the Customer Information. The Credit is initiated to the Customer by Branch, direct to Bank and Back Office. The application goes through many modules before it lands up in Final Booking. There are various modules such as Data Verification and Data Enrichment, Profiling the Data, Credit Processing, Approval and Final Booking. Various Background calls, Demographic checks, Internal and External Bureau calls, Liquidity Analysis, Credit decision calls and Third Party calls happen before the Final Booking.

Responsibilities

- Primary developer in Credit Processing and Credit Profiling modules.
- Involved in **High level** and **detailed level** design of different data feeds. Developed different process flows using TIBCO Active Matrix Business Works for the existing applications mentioned above.
- Developed the module for various countries such as **Australia, Japan, China, India, Taiwan, EMEA and CEEMEA.**
- Extensively worked on **Requirement gathering** and writing **functional** and **technical documents**.
- Designed the process workflow through the iProcess modeler.
- The proposed solution is based on two widely accepted architecture paradigms: Business Process Management (BPM) and Service Oriented Architecture (SOA).
- The required process modeling would be performed using the iProcess modeler in TIBCO. This would in turn call the required web services which perform the task in their business processes done through TIBCO BW.
- Involved integration between TIBCO iProcess and TIBCO Business Works
- Involved in designing the Workflows, Rule bases
- Created the work flow design in TIBCO BPM and integrated with TIBCO Business Works through the EAI Plug-in
- Created procedures, steps and links in TIBCO BPM Iprocess
- Deployment of the created BPM procedures
- Involved in creating **schemas** for the BW Process.
- Implemented high level design, Test documents and development solutions.
- Worked on **creating EAR** and scripts for **manual deployment** process through **TIBCO Administrator**.
- Involved in generation of **WSDL'S** and **Services** using TIBCO BW
- Developed business processes by configuring shared resources, creating process definitions, creating activities and configuring message transports using **TIBCO Active Matrix Business Works in TIBCO Designer**
- Worked with **SOAP, HTTP, JDBC** activities and General activity pallets using TIBCO BW and protocols like HTTP, HTTPS, JMS, and RV.

- Involved in **Installation** of TIBCO components (TIBCO TRA suite, EMS, Business Works) & domain setup.
- Designed and Implemented **Business processes** and **Error Handling** Processes using Business Works.
- Developed required **XSD schemas**. **Client / Onshore** co-ordination on daily & weekly basis.
- Set up the Queues, Topics, Connection Factories, and Bridges on **TIBCO EMS Server.**
- Taken care of all the **SIT/UAT deployments**. Done the testing the interface with the **Third Party Teams.**
- Contributed in all the Support and Maintenance activities in **SIT/UAT**
- Also responsible to perform the analysis for various **change requests, perform impact analysis** to find out the systems/programs that could be potentially affected by proposed change(s), coding, and testing and implementation activities.
- Preparation of the following various **technical and functional documents** (where applicable depending on the request types) Requirement Specification document, High Level Analysis and Approach document, High Level Design Document, Detailed Design Document, System test plan and test procedure document and implementation plans.
- Further responsibilities also comprise of ensuring top quality deliverables from Wipro to client and collection of project metrics.

Environment: TIBCO BW 5.x, BPM, TIBCO EMS, TIBCO iProcess, TIBCO iProcess Engine, TIBCO Service Grid, TIBCO Administrator, SOAP UI, XML Canon, IBM RTC, Oracle SQL Server, UNIX- Tectia SSH Client.

WIPRO- Chennai, India **Jan 2010 – Dec 2010**

Project#1

Customer Inquiry

Role: TIBCO Developer

Client Description

- WIPRO is an Indian Multinational Information Technology (IT) consulting and outsourcing service company headquartered in Bangalore , Karnataka in India
- Wipro is globally recognized for its innovative approach towards delivering business value and its commitment to sustainability.
- Wipro champions optimized utilization of natural resources, capital and talent. Today Wipro is the trusted partner of choice for global businesses looking to 'differentiate at the front' and 'standardize at the core' through technology interventions.

Project Description

- Customer Inquiry deals with inquiring the Customer Address and Contact details from the Database.

Roles and Responsibilities

- Primary developer engaged in Design and Development
- Managed various error handling and logging techniques.
- Involved in generation of **WSDL's and Services** using TIBCO BW.
- Involved in creating **XML Schemas**, Data Map, preparing Low Level design documents
- Understanding Business requirements and Business processes.
- Set up the Queues, Topics, Connection Factories, and Bridges on **TIBCO EMS Server**
- Involved in **Deployment** and **Administration** of the project, used TIBCO Administrator GUI to monitor and maintain BW process engines.
- Was responsible for creating Validation Plans and Test cases for Unit Testing and as well as doing Integration testing.
- Developed business processes by configuring shared resources, creating process definitions, creating activities and configuring message transports using **TIBCO Active Matrix Business Works** in TIBCO Designer
- Preparation of the following various technical and functional documents (where applicable depending on the request types) Requirement Specification document, High Level Analysis and Approach

document, High Level Design Document, Detailed Design Document, System test plan and test procedure document and implementation plans.
- Further responsibilities also comprise of ensuring top quality deliverables and collection of project metrics.

Environment: TIBCO BW, TIBCO EMS, TIBCO Administrator, SOAP UI, MySql

Project#2
Role: TIBCO Developer
Project: Employee Management System
Project Description

- Employee Management System manages all the Employee Details and Employee Process such as Payment, Claim, and Transport. It manages to make a back up through TIBCO Active Database Adapters.

Roles and Responsibilities

- Primary developer engaged in **Design and Development**
- Managed various **error** handling and **logging** techniques.
- Support and Bug Fixing in Unit Testing.
- Involved in generation of **WSDL'S and Services** using TIBCO BW.
- Set up the Queues, Topics, Connection Factories, and Bridges on **TIBCO EMS** Server
- Involved in Creating **XML Schemas**, Data map, preparing Low Design Documents.
- Understanding **Business Requirements & Business processes**
- Design architecture options for future enhancements and suggest improvements in current architecture.
- Developed Business processes by configuring shared resources, creating process definitions, creating activities and configuring message transports using TIBCO Active Matrix Business Works in TIBCO Designer
- Involved in configuration of different environments like Development and Testing for the TIBCO Active enterprise tools like Enterprise Message Service, Business Works, and Administration.
- Preparation of the following various technical and functional documents (where applicable depending on the request types) Requirement Specification document, High Level Analysis and Approach document, High Level Design Document, Detailed Design Document, System test plan and test procedure document and implementation plans.
- Further responsibilities also comprise of ensuring top quality deliverables and collection of project metrics.

Environment: TIBCO BW, TIBCO EMS, TIBCO Administrator, TIBCO Adapters, MySql

Project#3
Role: Java Developer
Project: Employee Detail Migration- Batch Application
Project Description

- This application will provide critical financial data of companies in tabular and reporting form. Thus the user can take financial decisions about their Portfolios.
- This will provide the users with ability to compare between various companies based on their financial metrics.

Roles and Responsibilities

- Primary developer engaged in **Design** and **Development**.
- Managed various **error handling and logging techniques**.
- Design architecture options for future enhancements and suggest improvements in current architecture.

- Preparation of the following various technical and functional documents (where applicable depending on the request types) Requirement Specification document, High Level Analysis and Approach document, High Level Design Document, Detailed Design Document, System test plan and test procedure document and implementation plans.
- Presented in the **"CITIBANK ACADEMY"** and won accolades for my Innovative skills.
- Further enhanced the project with the further requirements.

Environment: Java, Eclipse IDE, SQL Server 2005

Project# 4
Role: C, UNIX Developer
Project: Lift Scheduling
Project Description: Lift Scheduling focuses on the best usage of the available lifts and conserves energy and time. Thus the system brings the most appropriate lift to the user.

Roles and Responsibilities

- Understanding Business Requirements and Business Processes.
- Involved in all phases of **SDLC**
- Design architecture options for future enhancements and suggest improvements in current architecture.
- Generate (if needed) throwaway prototypes to understand complex business requirements.
- Help the team in meeting their deadlines, solve technical problems and provide technical design suggestions, guide them in designing Schemas for their interfaces, validate and suggest how to design the process flows, do the code review of their interfaces and help them fixing the bugs.
- Presented in the **"WIPRO TRAINING ACADEMY"** and won accolades for my Innovative and technical skills.

Environment: C, UNIX.

IATA- Chennai, India **Jan 2009- Dec 2009**
Role: Project Intern in Wipro Technologies, Chennai, India.
Project: AMS Tracker
Client Description

- International Air and Transport Association is an international industry trade group of airlines headquartered in Montreal, Quebec, Canada.
- IATA's stated mission is to "represent, lead and serve the airline industry." All the Airline rules and regulations are defined by IATA.
- The main aim of IATA is to provide safe and secure transportation to its passengers.

Project Description

- AMS Tracker is a service desk tool that is used to serve the business users who report their errors/issues/incidents/problems to the service desk analysts.
- It is the service desk product that offers you service request, incident and problem change management capabilities that maximize analyst productivity and enhance responsiveness.
- The service desk responds to and reports the status of problem bugs and end-user service requests.
- It ranks and prioritizes the problems based on severity and also improves service desk efficiency.
- It also improves customer satisfaction with Service Desk.

Roles and Responsibilities

- Design and development of the tool.
- Involved in all phases of **SDLC**
- Understanding **Business Requirements & Business processes**
- Design architecture options for future enhancements and suggest improvements in current architecture.

- Contributed in all the Support and Maintenance activities in **SIT/UAT**
- Also responsible to perform the analysis for various **change requests, perform impact analysis** to find out the systems/programs that could be potentially affected by proposed change(s), coding, and testing and implementation activities.
- Preparation of the following various **technical and functional documents** (where applicable depending on the request types) Requirement Specification document, High Level Analysis and Approach document, High Level Design Document, Detailed Design Document, System test plan and test procedure document and implementation plans.
- Further responsibilities also comprise of ensuring top quality deliverables from Wipro to client and collection of project metrics

Environment: ASP .NET, JavaScript, C#, IIS, Microsoft Data Access Application Blocks, SQL Server 2005, CVS Tortoise, HTML, Microsoft Enterprise Libraries 2006 Binaries.

Anna University- Chennai, India **Sep 2004- Dec 2008**

Project: Payroll Processing System, Library Management System, College Management System

Project Description

- **Payroll Processing System** is the internal processing system for the College, which has various modules such as Leave, Tax, Net Pay, and Gross Pay.
- **Library Management System** is the internal processing system for the College Library, which has various modules such as Creating Books, Adding Books, Request Book, Check Availability, Issue Book, and Check Due.
- **College Management System** is the internal processing system for the College, which has various modules such as Resource Management, Cost, Staff and Students.

Roles and Responsibilities

- Design and development of the tool.
- Involved in all phases of **SDLC**
- Design architecture options for future enhancements and suggest improvements in current architecture.
- Contributed in all the Support and Maintenance and Enhancement Activities
- Also responsible to perform the analysis for various **change requests, perform impact analysis** to find out the systems/programs that could be potentially affected by proposed change(s), coding, and testing and implementation activities.
- Preparation of the following various **technical and functional documents**.
- Won many Accolades for all the **College projects**.

Environment: Java, JavaScript, Oracle 9g, SQL Server, CVS Tortoise, HTML.
