Databases & Tools	Microsoft SQL Server 2000/2005/2008, Oracle 8i/9i/10g
Other Utilities	Pega PRPC v5.5, v6.1, Pega SD Framework, Pega CPM Framework, Pega DCO, SOA, Clarity, Microsoft Project, Microsoft Share Point, Microsoft Commerce Server, .NET Framework, COM/DCOM, Visio, OOAD, RUP, UML, SAP Business Connector, SOAP, WSDL, OLAP, Data Modeling, Big Data Ecosystem

SUMMARY:

Jagannath has over 13 years of extensive experience in managing large and complex programs and projects, involving multiple geographies, spanning different types of engagements from large application development, application maintenance, and business process re-engineering and distributed systems. He has worked with Fortune 500 Clients in Banking & Financial Service, HealthCare and Logistics Industries in United States and Canada.

He is a PMI certified project manager (PMP), skilled in process improvement, streamlining, optimizing, oversight and control, having experience in handling end to end BPM programs of various scales and complexities, predominantly in PEGA based engagements. He has extensive experience managing all phases of system development including requirements definition, design, construction, testing, implementation and support. He has experience in Enterprise Architecture (TOGAF), Distributed Systems (SOA) and Big Data Platform.

Jagannath is a Certified Scrum Master (CSM), having experience in various SDLC methodologies like Agile, Iterative and Waterfall. He is excellent in client relationship management, with strong leadership and interpersonal skills.

Prior to joining Cognizant, Jagannath worked as a solution architect for Wipro Technologies.

EMPLOYMENT HISTORY:

Name of the Company	Designation	Address of the employer	From	To	Duration (Years)
Cognizant Technology Solutions	Manager Projects - BPM	Kolkata, IN Teaneck, US	March 2008	-	5 years 2 months
Wipro Technologies	Architect/ Technical Lead	Bangalore, IN East Brunswick, NJ	November 2000	February 2008	7 years 4 months

PROJECT PROFILE:

Project/Program Title	Customer Positive History - Big Data Platform
Duration	May 2013 – ongoing
Location	Phoenix, AZ, USA
Operating Systems	IBM AIX v6.1, Windows
Programming Languages	Hadoop, Hive, Java

PROJECT DESCRIPTION:

2013 Chairman's Award for innovation winner to AMEX Big Data capabilities that find new ways to pull insights from data to deliver relevance and value to AMEX merchants and card members. The Customer Positive History moves all current historical Fraud & Credit variables from being calculated in CAS to Big Data platform. These variable roll ups will then be passed back onto CAS (Credit Authorization System) for use in authorization. This project allows for CAS to no longer store records beyond 30 days. Enable better customer insight given Big Data capabilities make significant progress towards POA architecture and overall fraud benefit include 120MM.

ROLES AND RESPONSIBILITIES:

Jagannath is the Program Manager, managing several projects in Big Data Portfolio

- Managed multiple Big Data ecosystem projects with multi-vendor pproject teams
- Responsible for planning, financials, delivery and communication management
- Managed business partners expectations
- Driving requirement sessions with Business Stakeholders
- Prepared project charter, project plan, financial plans, risk & contingency plans

Project Title	GMS Exposure Management
Duration	Sep 2012 – April 2013
Location	Phoenix, AZ, USA
Operating Systems	IBM AIX v6.1, Windows
Programming Languages	Pega Rules Process Commander PRPCv5.5, DB2, Java, Hadoop, Teradata

PROJECT DESCRIPTION:

GMS Exposure Management provides an end to end case management and risk monitoring capability for monitoring the financial stability and exposure of merchants, who have a proprietary contract with the bank. Merchant exposure arises out of non-delivery of goods and services to card members and disputes/returns for which the bank has already made a payment to the merchant. This exposure can be partly or fully mitigated through collaterals which would include pending payments to merchants, holdbacks, and other forms of collateral example lien, letters of credit. Merchant exposure and collateral information was dispersed across various platforms, so it was difficult to estimate and mitigate merchant exposure efficiently. This project aims at improving accuracy and simplifying the existing capabilities for monitoring merchant risk exposure, decision and risk assessment document collection while reducing the overhead costs by removing redundant systems/capabilities.

ROLES AND RESPONSIBILITIES:

Jagannath is the Project Manager for this Global Exposure Management

- Managed distributed project teams
- Responsible for project planning, estimation, delivery and change management
- Managed client relationships
- Prepared SOA, project charter, project management plan, risk and contingency plan
- Provided technical leadership to BPM project team on resolving /addressing critical issues, identifying process improvement areas

Project Title	QTB (Quote to Bill) 51+ 2012
Duration	April 2012 – Sep 2012
Location	Owings Mills, MD, USA
Operating Systems	IBM AIX v6.1, Windows
Programming Languages	Pega Rules Process Commander PRPCv6.1, Oracle 10g

PROJECT DESCRIPTION:

Quote to Bill and Broker Express projects are part of QTB 51+ market segment program, provides a major US HealthCare client a platform to its partners to sell new business and collect binder payment from its customers. Developed a comprehensive rule based system leveraging Pega Group Sales Process Manager framework, for group enrolment process that includes new features in the prospect creation and quote creation after a competitor analysis for sales and quoting system for payers. This implementation improved the efficiency of the quoting process by bringing down the processing time from 2 days to 10 minutes and reduced manual steps in quote creation from 23 to 8. The user interface with the best user experience designed keeping the external users in mind.

ROLES AND RESPONSIBILITIES:

Jagannath was the Project Manager and Business Analyst for this engagement

- Managed the distributed project team
- Managed project delivery, builds and releases
- Managed client relationships
- Analyzed business processes, identified process improvement areas
- Developed requirement documents, use cases and mock-ups
- Prepared project management plan, change management, risk and contingency plan

Project Title	Trillium
Duration	October 2009 – March 2012
Location	London, ON, Canada
Operating Systems	IBM AIX v6.1, Windows
Programming Languages	PegaRules Process Commander PRPCv5.5, PRPC Smart Dispute framework v5.5, Oracle 10g

PROJECT DESCRIPTION:

Developed a cost effective solution for a major Canadian bank, for processing debit card disputes, where the front office users initiates a claim which will be further processed by back office users. The solution built on Pega Smart Dispute framework involves a dispute lifecycle process from initiation to resolution including reimbursement, chargeback, re-presentment, pre-arbitration and arbitration. The BPM implementation reduced average resolution time for disputes routed to back-office; streamlined case processing and enhanced efficiency by increasing card dispute resolution speed by 70%.

ROLES AND RESPONSIBILITIES:

Jagannath was the Project Manager and Business Analyst for this engagement

- Managed the BPM implementation from inception to completion
- Managed the onshore/offshore project teams and communications
- Managed client relationships, vendor relationships
- Analyzed business processes, identified process improvement areas
- Prepared project plan, estimations, SOW, change requests, risk & contingency plan
- Developed use cases, wireframes, design documents
- Managed quality control activities, PMR

Project Title	Delivery Management- Offshore (BFS-NA-Canada Projects)
Duration	March 2009 - October 2009
Location	Kolkata, India
Operating Systems	IBM AIX v6.1, Windows
Development Environment	Pega Rules Process Commander PRPCv5.5, Pega Customer Process Manager framework

	v5.5, Oracle 10g

PROJECT DESCRIPTION:

Delivery management of multiple fixed-bid and T&M contract based onshore-offshore (multisite) BPM engagements of two major Canadian banks.

ROLES AND RESPONSIBILITIES:

Jagannath was managing offshore delivery of multiple BPM projects; his key responsibilities were providing leadership and technical guidance to ensure quality delivery on time and within budget.

- Prepared SOW, estimations, project plan, change requests, risk and contingency plan
- Managed project deliverables, respond to RFPs
- Managed 25+ consultants and leads across multiple projects in ODC and onshore
- Quality Control activities (PMR, design and code reviews, pre-fights, guardrails)
- Resource management, mentoring and resource building
- Developed re-usable assets for BPM COE

Project Title	Optimal Outcome
Duration	July 2008 – February 2009
Location	Kolkata, India
Operating Systems	Unix, Windows
Development Environment	Spring 2.5, ExtJS, ALBPM 6, Oracle 10g

PROJECT DESCRIPTION:

Developed for a major US bank, the Optimal Outcome, is a workflow enabled automated decision engine allows the enterprise to serve customers in a consistent and compliant manner with an outcome, that suits the borrower, investors, rating agencies, regulators and the organization. The Optimal Outcome created a consistent, multiple channel decision making process and present a hierarchy of optimum and conforming default resolutions, based on critical or key data elements obtained throughout the interaction to the borrower.

ROLES AND RESPONSIBILITIES:

Jagannath provided leadership and technical guidance for Optimal Outcome project

- Managed Agile Scrum project (Scrum Master) and overall delivery
- Guided the Scrum teams of 15+ consultants and leads,
- Managed daily Scrums, 'Scrum of Scrums', Sprint review and retrospective meetings
- Prepared project plan, release plans, risk and contingency plan
- Quality Control activities (PMR, design and code reviews, pre-fights, guardrails)
- Resource management (onsite and ODC), mentoring, capacity and utilization planning
- SOW preparation, estimations, Invoicing

Jagannath during his tenure at Wipro Technologies as a technical project lead also worked for

- Major software corporation in US
- Major logistics services company in US

- Major British multinational consumer healthcare company in US
- Major brokerage and banking company in west coast US
